EGM SELECTED AS BEST U.S. GAME MAGAZINE AT ECTS!

We're quite pleased. It's always a great honor to receive any type of recognition, but when it comes from an official organization outside one's own country, it is something really special! The event was the European Computer Trade Show (ECTS), which was held in England in mid-April. This show is the video game and computer show in all of Europe and, to put it in perspective, this show is the European equivalent of our Consumer Electronics Show and, like ours, is held twice a year. Thanks!

It was a good show. If anything, it was the first real occasion which demonstrated that the video game world is more than just the United States and Japan. Many more games are now being developed in England, France, Germany, and Russia and this is no deep dark secret as virtually all of the major U.S. and Japanese companies had representatives out 'shopping' for new ideas or licenses from this undiscovered wealth of video game development talent. There certainly was a lot of heavy game development talent. There certainly was a lot of heavy dealing going on, both on the floor and in the meeting rooms. All of the new hardware was there, assuming you knew where to look and if you had the proper credentials. The Sony PS-X was up and running off-site and the Saturn development system was being shown under nondisclosure. Nintendo had their Game Boy to Super NES adapter playing, and the talk between developers at the bar would have melted a reporter's tape recorder.

It was hard to believe it was London and not the U.S., until buying something. Expensive! Not as bad as Japan, but nowhere near the U.S. Remember the McDonald's cheeseburger discussion from last month? It's over \$2 in Tokyo and \$1.40 in London. Want to buy a video game? If it costs \$50 here it's £30 in London. Not good when you also figure in an exchange rate of about 1.5 to the British pound. Taxes are a major portion of any purchase. There is a 14 percent import duty and a 17 percent tax tacked onto good things like video games or systems. Kind of looks like the good old U.S.A. still has the best deals.

In other news, the countdown has begun to the first issue of EGM. We're staffed up and the work on the first, and only, biweekly voice of the industry has begun! The big day is July 19. Look for it!

LETTER OF THE MONTH!

EGM IS NUMBER ONE IN EUROPE!

It's no big surprise that you guys are the number one magazine for new information. I've always been happy with the cool tricks in the Tricks of the Trade section, the great news from Terry Aki in Japan, and the recent introduction of the International Fact Files. What I have to say might sound strange, but have you guys ever considered a publication outside of the U.S.? I mean, I buy a lot of foreign magazines, namely European and Japanese, and there are plenty of times when I see foreign games in your magazine first. If those guys can't even cover games in their country, yet you guys manage to here in the States, that must certainly mean something. It's just something I've been thinking about lately and I'm sure readers of your magazine in other countries would be thrilled with the idea.

Brad Cuttone
Baltimore, MD

(Ed: Thanks for all of your kind comments, Brad! You may not have known this, but we are already sold in various countries such as England, Canada, and Australia plus we are currently looking toward branching into France and Germany. Our reputation for current information is very well received in these countries, too. In

EGM was selected as the best U.S. mag at the ECTS!

fact, EGM was selected as the magazine to best represent the interests of the U.S. players at the ECTS (European Computer Trade Show)! All mags were considered, but EGM was picked hands down. We consider it a great honor and privilege to be recognized by the game companies and other officials of the industry in Europe! We're not content to stay number one in just the U.S. You see, EGM is planning to open an office in London and there could very well be an EGM Europe in the near future, developed for the European market. Other awards were given to companies such as Alan for the Jaguar as System of the Year and Saturn as Shotgun by SNK as the Game of the Year.)

WIN A PAIR OF ACCLAIM JOYSTICKS!

The best letter submitted each month will win his/her choice of either the Super NES or Genesis version of Acclaim's hot, new Dual Turbo Wireless Remote System.

AN RPG DILEMMA

Can somebody please tell me what the holdup is with Final Fantasy V? Let me just start by saying that I like RPGs and am quite a fan of the Final Fantasy series. I'm a little disappointed that Japan already has six games in the Final Fantasy series and we only have two here. In an issue about a year ago, you said that Final Fantasy V was supposed to be released here as Final Fantasy III last November! What's the delay? All I hear is a little mention here and there, but I see no sign of a being released soon.

Timothy James
Loveland, CO

Final Fantasy III will be coming to the States before the end of the year!

(Ed: In case you haven't heard the latest word, Square Soft will be releasing Final Fantasy V as a totally separate game from the Final Fantasy series. Since the story line in FF5 is different from the other FFs, and it's much harder too, they chose to market this game toward an older and more experienced gamer. But what about Final Fantasy III, you ask? The Japanese version of Final Fantasy VI that was recently released in Japan will become the American version of Final Fantasy III. As for release dates, Square has set FF III for an October release and the other game is set for an early 1985 release.)

OUT OF ALIGNMENT

Whatever happened to paddle-type controllers? It seems that racing game simulators are so much more fun to play with steering wheels, just like the arcades, rather than the cumbersome thumb pads. Games such as *Race Driver*, *Virtua Racing*, and *Super Monaco GP* if just aren't done justice with a thumbpad, no matter how great the graphics and sounds are.

Gregory L. Walker
Saginaw, MI

The Sega Wheel offers more versatility for driving games like *Virtua Racing*.

(Ed: Your wish has been granted. Sega will be releasing the Sega Wheel, as it is called, around the same time as *Virtua Racing* for the Genesis. The wheel basically replaces the standard pad and gives more of a lifelike feel to the game. As you can see by the picture above, the six buttons are located on the wheel hub and are actuated by your thumbs. Of course, the familiar mode and start buttons are located within easy reach as well. The Sega Wheel is primarily targeted for *Virtua Racing* but should work well with other driving games out on the market. For ultimate driving realism, this is it.)

ASLOW LETTER OF THE MONTH!

If you think you know what it takes to contribute to society, go write to *Newsweek*. If, however, you have a thought or opinion that fellow gamers would particularly find scary, we'd love to immortalize you with a special edition EGM T-shirt proclaiming your fondness of and psychosis to video games!

I wonder how many readers get so angry at games, when they can't pass a certain part, they throw screens until they see their opinion. Most of my friends do. One of my brothers got so mad at his failure on John Madden Football that he threw the (actually very) expensive on the floor so hard he broke it. Two buttons popped right off. The Genesis controller will write, but now the top holding the buttons down is missing. The point is I have found a solution to this problem.

Step 1 - Right next to you, on the floor, put an old couch cushion or pad you have painted a target on.

Step 2 - Make sure you have another pillow handy, preferably the wall. Buffy type.

Step 3 - Go find the box your game system came in or, if you can't find it, find a box the right size you prefer and paint a picture of your system or its name on it. Put it right in front of you.

You have now made a "GSP" (Game System Protection Set). When you think you've been cheated simply remember this problem. First, you can throw the controller down as hard as you like as long as it hits the target. Second, if you feel like screaming and establishing your pillow against your face and yell all you wish. Third, you have the box in front of you to kick, punch, stomp, jump on, or whatever. Have you looked your box today?

Our psychotic winner this month is Michael Trehan from Tucson, AZ. You've got a great idea there, Michael. Now you can return your luffy pillow to your bed and scream into a lovely EGM T-shirt which is on its way.

A FOOT IN THE GRAVE

I was wondering about my Duo because you say that it's dying. Well, I'm sure I am speaking for Duo owners everywhere when I ask that if the Duo dies, what will happen to us Duo owners? Will we still be able to get old software titles? I mean, all of us Duo owners shelled out \$300 for the Duo and have invested a lot of time and money to buy games for it. If the Duo dies, will we be left with a useless machine?

Ramona Talarico
Franklinville, NJ

(Ed: T.T.I. has done a complete turn around with their company. After a brief phone conversation, a representative from their public relations firm stated that T.T.I. will not sell or release 16-Bit hardware in the U.S. or Canada. That means they won't sell systems, but warranty work will continue in authorized service centers. As for the games, T.T.I. will release a minimum of six titles through a direct market. More news on this direct ordering policy will be explained next month. As for the future of T.T.I., they are redirecting their efforts toward developing new hardware. Possibly the Iron Man?)

BAD PHOTOCOPY CONTEST!

A new feature to EGM is the official Bad Photocopy Contest. You'll find this contest in every *Interface* issue. What we did was photocopy a part of the magazine, blew it up, oh, 800% and it's up to you to find it somewhere in the magazine. You don't win anything, but you can congratulate yourself if you find it!

Here it is! Attempt to find this picture in the magazine, if you can!

In the future, T.T.I. will offer new titles like *Godzilla* through a mail-order system.

Silicon Valley Execs Bag Corporate Life; Will Bring Mind-Bending Technologies to Consumer Gaming

You won't believe this, man. These guys from Silicon Valley have turned and turned from their computer technology jobs so they can take what they learned and bring their own cool stuff to gamers like you! They're called ASG Technologies, technologies being the key operating word!

Video JukeBox for Sega Genesis, SNES, and Atari Jaguar

ASG is calling this the "VJ," for us lazy megagamers. It holds six game carts on-line, letting you select games effortlessly. And it's networkable, so all you need to do is take their cool computer-ribbon cable and connect one VJ to another VJ, and then another, and so on, to hold 12 carts, 18 carts, 24 carts—up to 30 carts! All you do is toggle between games by pressing a button on the control deck. Just tuck on your game system and you're wired! The Jukeboxes stack together and look like a stereo system! Just Rack 'Em and Stack 'Em! It even has a side slot to hold those useless game manuals you never read. How many clans for this radical VJ? About as many hotcakes as a cart costs!

The IR Deck Universal Remote plus IR Docking Station

For the ultimate lazy-coach-gamer, ASG's going to ship an awesome combo universal remote control and infra-red docking station this Fall. This multi-product solution comes with a universal remote control to select carts on your VJ, while controlling your stereo, VCR, TV, and game system. And, ASG will make an IR Docking Station that sits on the coffee table, holding the remote while providing an infra-red link to hold the joysticks you already own. It'll work with all game joysticks, so you won't have to go out and buy an IR joystick! The Deck will engage features like slow-mo and rapid-fire on your regular joypads, and runs faster than most IR products! The clans on this baby? Again, about as much as a cart costs!

video JUKEBOX™ NETWORKED MULTI-CARTRIDGE DOCK

You want software? Check this out!

These dudes are Boosense & Booger. They're twisted, grosser than a vomit-dripping pizza, and are going to spit and slobber at you, real soon! It's the most disgusting game ever created! It takes place inside Boosense's diseased, deformed body. Booger is a classic, grungy-rocker-teenage-punk with a major attitude! More will be written in the next issue about these clam-hawkers. Stay tuned!

And there's even more. They don't want to say what's really behind their lab doors, but it will definitely redesign gaming!

3DO NEEDS RPGS

Honestly, I am not at all surprised the 3DO system's sales are very low. From what I've gathered, they don't even have a single RPG out. With their so-called superior graphics over the other "game-only" systems currently out, you would think they would have at least one RPG out to show up the competition. As you may have already guessed, I am an RPG junkie. Panasonic is really overlooking a lot of potential buyers with their proxy system. I only hope that Alan doesn't make the same mistake. I read in an earlier magazine of yours that "we gamers" can fight for the games we want to play. EGM rules!

Chris Collins
Humble, TX

Involving games like *The Incredible Machine* should keep players busy.

(Ed: I completely agree that there should be RPGs for the 3DO. While there aren't any right this minute, developers won't want to miss out on this growing segment of the video game industry. One thing you need to remember is that RPGs take a lot longer to develop and program since they always have long and complex plots. Developers need more time to work out these time-consuming games. Besides, wouldn't you rather wait a little longer to make sure the game is actually worth it? I certainly would. However, there are some games that don't exactly fit into the RPG category but certainly offer plenty of playing time. These games include *Star Control II* and *The Horde* from Crystal Dynamics and *The Incredible Machine* from Dynamix. These types of games offer weeks of game playing time, just like RPGs. It's only a matter of time before RPGs really come on strong for the 3DO, and when they do, you can be sure that we'll be here to give you the scoop on what's hot and what's not.)

S-VIDEO FOR SUPER NES

Recently, I was at a friend's house and we were playing Mega Man X on his Super NES. When the Capcom logo came on the screen, it was clearer than anything I had seen on my TV and I love the same model he does. I asked him how he made the picture so clear and he told me that he bought an S-Video cable that ran from the jacks behind his Super NES to the S-Video jack on the back of his TV. I then asked him where he purchased this cable and he told me about a toy store that sold them. I've been to every branch of this store and none of them seem to have it in stock. I would like to know if you've heard of these cables.

David White
Arvada, CO

(Ed: Sure, we've heard of those cables David. You should be able to find them at most stores that carry Nintendo accessories such as cleaning kits and extra power supplies. If that option doesn't turn up anything, try ordering from a mail-order company for results. You can probably expect a higher price, though. S-Video does look great through the newer TVs and is an extremely noticeable improvement over the humble RF input.)

GIVE ME MORE RAM!

I've been playing video games ever since my brother and I had an Atari "Pong" home game attached to the back of an old black and white TV in our room. Since that time, I have had the opportunity to own and play many different game systems ranging from the 8-Bit Nintendo to Atari's 64-Bit Jaguar. While the Jag is awesome, I really enjoy playing my Sega CD. But there is something that I always wondered, is Sega ever going to come out with a RAM Cart so we Sega CD owners can have more space to save our games? It's gotten to the point where I won't buy any new Sega CD games because I don't have enough free memory to save a lot of new games. I rented Jurassic Park only to find I couldn't save my game. While I like JP, there's no way I'm going to sit down and play it from start to finish in one session.

I'm stuck between a rock and a hard place. I don't want to delete the games I've already saved but I would like to have some new ones. I was told by one mail-order company that the RAM Cart is going to be released at the end of April, but I

haven't seen any advertisements for it in any of the game magazines. Is this true? If not (when, if over) will Sega release it?

Scott Hunter
San Jose, CA

Sega will finally be bringing out the much needed RAM Cartridge for the Sega CD.

(Ed. What seemed would never become a reality will soon be coming our way. Sega has decided to release the RAM Cartridge for the Sega CD. This handy add-on was released ages ago when the Mega CD first hit the shelves in Japan. Its benefits are quite apparent. Since RPGs and heavy-duty war simulations are all the rage in Japan, naturally the save-game files are quite large, which is where the added memory in the RAM Cartridge comes in. The limited RAM in the Sega CD is precisely the reason Koel, who are also known for their heavy-duty games, couldn't release any Sega CD games for

the Sega CD. Perhaps that can change now. When the cartridge is due to come out is still up in the air but it would be a great investment for anyone who frequently saves games on their Sega CD.)

GOING THE WRONG WAY

Is it just me or is Nintendo going in the wrong direction? Rather than introduce us Super NES owners to new and exciting game technology, they want us playing Game Boy games on the Super NES. They say we'll be able to add some color, but why? Correct me if I'm wrong, but Nintendo has several hundred 8-Bit games already with color. Why not make a converter for those? That's something the public was pleading for when the Super NES was first introduced: I don't feel adding color to a Game Boy game, which I'm sure will be quite limited, can save its graphics. I say it's three years too late for the wrong system.

Steve Guderik
Ottawa, Ont., Canada

(Ed. It may seem a little late but it will certainly cure the Game Boy's screen curse of blurring when the game moves too fast. Also, why should Nintendo create a converter for NES games when a brand-new NES would end up being cheaper than a converter? Response to this peripheral must be pretty good if Nintendo is going ahead with the project. Only time will tell the success of this idea.)

TOO MUCH OF SEGA

I have been a Sega fan for many years now and have all the Sega systems. However, I have a problem with Sega's concept of adding on to other systems instead of coming out with a whole new system. The whole idea seems like it saves me money, but it really doesn't. After purchasing my Genesis, I was satisfied with it until the Sega CD came out. At first, its price was way too high for me, but when it became cheaper, I purchased one. Now that the 32-X add-on is supposed to come out for only \$150, I planned to buy this as well. Recently, I have begun to have second thoughts. After doing a little figuring, I realized I had spent more money on the system itself than the games. Add up the price of the Genesis, Sega CD, and the 32-X and it becomes quite an expensive system after all. When the 32- and 64-Bit systems emerge next year, the 32-X system will be no match for them, hindered by the older technology of the Genesis. I should have stayed with my Genesis and used my money to buy games, rather than add-on newer equipment.

With the Game Gear, Sega CD, Genesis, Genesis 32-X, Sega CD 32-X, and the upcoming Saturn, Sega sure has a lot of systems to make games for. Make a great Sega CD game and the Genesis owners aren't happy because they can't play it. Make a great Genesis game and the Sega CD owners aren't happy because they feel they may have wasted their money on a system that isn't that great after all. Will the Genesis and its add-on die out when the new systems take over, just like the 8-Bit Nintendo did? I would be very reluctant to purchase a Sega Saturn if I just bought a 32-X and spent almost \$500 on the Sega CD 32-X. I like Nintendo's idea of waiting until there is a significant enough improvement in the technology before bringing out a new system. I'm not saying that anyone should leave Sega, but I think you should think twice before buying an "inexpensive" add-on to the Genesis.

Bryan Marka Fayetteville, NC

(Ed: This is a hard question to answer! It may not be cheaper for you to buy them, but it's definitely cheaper for big companies, like Sega, to introduce add-ons rather than spend loads of cash for new equipment and development time on a whole new system. It's just good business sense to think that way, if the thought of Sega producing so many systems bothers you, then why buy them? If Sega didn't make money, they wouldn't be doing it. Nintendo may be more cautious, but Sega does get out there to test the waters.)

ED SEMRAD

I was a big time addict to the original, and this game brought back so many good memories for me. The graphics are great and the plotting is very solid. The control is crisp and clear, and the multiple endings is a great addition. My only complaint is, for some reason, this game seems a bit slow. Maybe it's because of the map... Anyway if you own a Super NES, this is definitely a must-have. It's great!

AL MANUEL

Nintendo pulls out all the stops with quite possibly the greatest action/adventure game ever created! I have never loved a more addictive game. This is as close to perfection as any game can get. Incredible graphics! Music and sound are ultra-cool! Game play is superb. The combinations of items and items Samus can use give the game variety. The multiple endings are also cool. This game is awesome!

DANYON CARPENTER

The game the world has been waiting for has finally arrived. The original 8-Bit Metroid was fantastic and this game only does it justice. The graphics are just and sheer amount of hidden items, and the great background lanes add up to one of the best adventures. The auto-map is a cool feature, but can make the game quite easy, unlike the 8-Bit Metroid Overkill, no one should be disappointed with this incredible game.

SUSHI-X

Yes, it's finally here! As a faithful player of the NES version, I have to admit, this sequel blows it away. It comes with more power-ups and items that will surely be helpful to the creators and designers that lurk within. As for the items, you will earn them as you don't keep track of them, you're going. Awesome background music and riveting sound effects. Graphics are too cool to miss!

Slam Masters

Fighting Release: New

Levels: N/A 24 Meg

The characters might not be as big, but this game is better overall than the arcade version. The control is top-notch and the Four-player mode had me work bashing my controller. I wish there was a difficulty setting when you defeat all opponents. Slam Masters is a good game as it looks. Some of the moves are really hard to pull off in the middle of a match, but it's worth trying.

For wanting that's fun, you really can't beat Slam Masters. It's a great translation from the arcade and in many ways, the control, it's very nice and fluid. There aren't a whole lot of special moves but this isn't exactly Street Fighter here. This game is an absolute riot with four players! As a bonus, the game is fun for parties and gatherings, but it's not one I'd want to sit down and play all day.

Capcom released Slam Masters and it's as good as any other arcade translation—complete with vibrant 3-D graphics and sound effects. I've seen a bit of an improvement in better game play. Even with all the positive things going on, there are a few things I don't like. First are the "miracle" moves and throws the computer can do to you! Cheap! Secondly, there could've been more moves. But, it's still good.

Wrestling at its best! The translation from the arcade to the Super NES is so close that you might start looking for it in all of the characters. I have with their special moves and tricks. You can even switch up to four players—slam it! The graphics and animation is superb, can't get better. The only problem I have with this is that it's too easy, being Super-X you know. Overall, a very good game.

Super NES Data East

Fighter's History

Fighting Release: New

Levels: N/A 20 Meg

Fighter's History is a good fighting game. It succeeds where many fail: the control. Its controls are really good, there are a lot of moves and each character has his/her own style, adding to the personality of the game. It's all games to win with the best of them. They don't seem like they have voices and a nice touch, I thought. Overall, this is a good game to pick up if you enjoy fighting arts.

While I typically don't drool on most fighting games, Fighter's History has some strong points. The control, in fact, is top-notch. There are many fighting games where you actually do a special move once. I really want to, yet with only one I can. The addition of break points on the characters is great! Fighter's History is definitely worth a look if you want something new in the fighting game genre.

As a fighting game, I think that Fighter's History is a decent cut. Unlike many fighting games that come out, this one has exceptional control. The controls are easy to pull off and the special attacks are great. The best part is knocking out all of the opponents and getting off. Very cool! It does lose a minor drop in the graphics and sound. It's definitely for light fans.

After all the publicity of this game with the Capcom suit, I don't see it being that similar. Several characters have special moves and such but it doesn't miss the feel of Street Fighter. It plays well with good graphics and ease of getting moves. The graphics and sound are top-notch and they are one of the best of this category. It could have benefited from some new innovations or more variety of moves.

Genesis Sega

Virtua Racing

Driving Release: New

Levels: N/A 16 Meg

Technically speaking, this genre's a masterpiece. It looks and plays great. My only problem is that it's just not that fun to play as the arcade. I think maybe the novelty is gone. On certain tracks, it's hard to tell where you're going. It's the best racing game I've had with its smooth graphics and sound. So glad a nice job on this one, but I wish their new chap did something with sound. Still a cool cat.

Virtua Racing is just the tip of the iceberg with this new type of technology. The game simply looks and plays great. It's obviously not the best of the arcade, but it holds up against other racing games. The sounds are legit, but they don't pay much attention to them when racing anyway. The computer really does up some strong competition and the game is a blast with two players. It's fantastic!

Virtua Racing comes out as a fairly decent translation. The graphics aren't identical to the arcade, but it still the best real-time racing on the Genesis while retaining the original feel of the arcade racing game. I would have liked that this is probably the best I have ever played on the system. The only drawback is that there is no replay value once you finish the track. I love it nonetheless.

This is one of the most realistic driving games yet. From the intense look of the polygons to the great graphics, this is a good adaptation of the arcade game. The different tracks make it seem like many different times in one, where you change the perspective you like to see while the second player can choose his/her own. It's not a flawless reproduction of the arcade game but it is still one of the best to date.

PTG: Operation Europe Kooli / Super NES

Another historical strategy game is a historical conflict by Kooli—strategy fans will want to check the out. Being able to pick your battle scenario and play as the Allied or Axis entry is a huge plus. A must for military buffs.

Lord of the Rings Interplay / Super NES

A pretty faithful adaptation of the source material, Lord of the Rings is a slower-paced RPG for more deliberate playing. The fighting is a little slow, but there is plenty to explore. This game has rewards for the patient player.

ES BAMB AL SUPER NESZ

GA Marie Antoinette Racing Electronic Arts / Genesis

Tons of options, two-player action and excellent scrolling are a few of the key elements in this racer. I liked the one-player screen layout the most, with the track map and other stats shown on the upper half of the screen. A great racer.

MA Mutant League Hockey Electronic Arts / Genesis

The brutal hockey version isn't as fun as football, but it is still a blast. There is a wicked sense of humor to this one (like bodies that you see rise floating under the ice, etc.). The scrolling is a bit choppy, but still a very fun game.

Despite a rather off-putting title, Noury's Beach Babe-4-Babe suffers from poor control, uninspired attack methods, and dreary music. Still, there are some colorful stages (with nice graphics), but that's about it.

Genesis Sega

Star Trek: TNG

Adventure Release: Now
 Levels: N/A 16 Meg

Star Trek: TNG is a good rendition of the show. The graphics and story line are pretty good, too. You can choose to get into, but most fans will like it. The audio is strong, contains fans, but the character are nice. The interface is pretty good, and you get the feeling of really being in control. You are a fan of Star Trek, Sega has made this game for you. I just wish that the graphics weren't as dark as they are.

Well here we are with Star Trek on yet another format. I like the concept behind this one and it's fun to play. Without short-circuiting this is its recurring tendency of the characters to not know the story you want them to. Is it a bad story? That's one way of putting it. Also, the stupidity of the attacks, suddenly popping out of nowhere at a pain in the rear. A good game hampered by a few problems.

I like Star Trek: TNG the TV series, but I can't say the same about this game. Maybe it's because of these types of games, but the graphics, I think the scrolling was drawn pretty well. The sound was also done exceptionally well right down to the support sound effect. It's good, and that likes games that you won't get tired of, this game has plenty of different missions.

If you is a diehard RPG or Trek fan, you might consider looking at this one. The digitized graphics, animations, and sound effects are mediocre. The game that really kills it is the way the controls on the plane. Once you get down on a planet, the game is passed by the enemy. The game scene in space was interesting. It's not how to be attacked by three ships when having a limited supply of weapons. Too bad.

Genesis Game Design

Bubba 'N' Stix

Puzzle Release: Now
 Levels: 5 8 Meg

This is an interesting way to make a puzzle game. At first it seems like an action cart, but it's much more than that. The attention to detail is very good. The graphics are nothing to sneeze at. The puzzle are intelligent and well thought out. The music and sounds are a standard Genesis fare, but at least they're not annoying. Bubba 'N' Stix is a cool game that should give the brains of the most diligent gamers.

OK, I'm not one to bag a puzzle game, but this one is just too hard! If you're used to puzzle games like Lomax's puzzles (like I am) you'll be in for a ride. The concept seems to be original and will take some time to get used to. The game plays decent enough and the sound is pretty cool as well. One thing that probably drove you nuts is the music. By the way, those are nice Super NES pictures in the commercial. Who let that slip by?

When I started playing this game, I have to say that it was a bit frustrating, because the control was a bit weird. But giving it a try, I found that the SBS is actually not so bad. It is a unique combination of action and a puzzle game. The graphics which are good, and somewhat detailed. The sound is too! There are even some comical animations of the main character. Cool and original!

For puzzle game fanatics and action game lovers, here comes a game with the best of both worlds. Bubba 'N' Stix has some really interesting puzzles that stand out beyond the crowd with its challenging puzzles to play, great sounds, and nice play control. The puzzle are really get tough (even though it really is pretty hard), but if you have your heart set on a new puzzle game, Bubba 'N' Stix should please.

Sega CD Arcia

Mortal Kombat

Fighting Release: Now
 Levels: 12 CD-ROM

Why not all that much different from the Genesis version, this game does fit in the arena where the cart games are lacking. The only real complaint I have is I see are with the scrolling, the music, and the lag time. On the other side, Mortal CD plays really good and the way the computer uses the patterns of the arcade makes this one more challenging. It's still not on par with the arcade, but still good.

Maybe I'm just spoiled by Mortal Kombat II, but this game has lost its appeal. The game really shows the same old same old graphics as the other games. On the bright side, the music and voices are nice. The character animation is the big time, although it's probably drive you nuts. The music. By the way, those are nice Super NES pictures in the commercial. Who let that slip by?

I don't know what is the big deal about this game. I thought the CD version of Mortal Kombat was supposed to be better. Instead, it's nothing more than a regular cartridge with some arcade music and an intro to give the look of the entire television commercial. Yet I have to admit that the game play is close to the arcade than the Sega CD. If you haven't already bought the cartridge.

The graphics aren't greatly improved over the Genesis version nor are the sounds. However, the character and has more accurate control. CD fans will be happy to see the access time was cut down. It doesn't bog down the play. All the character animation and combat work even better than the Genesis version. My only question is why did they put that intro from the commercial in there?

Incredible Machine	
Puzzle	Release: New
Levels: N/A	CD-ROM

Incredible Machine is a good game on the PC, and it's even better on the 3DO! While the interface is a little clumsy to use, the graphics are fun and the dialogue is impressive. And the size of the amount of puzzles will keep you playing for hours. If the controls were a little smoother, the game would have much better, considering wherf's out there for the 3DO this game is a winner for the thinking crowd!

8

7	7	7	7	6
ED	DANE	AL	SCOTL	MIKE

It is a neat change from all the multimedia-type games that seem to flood the 3DO. The PC translation is a little better with far better graphics. The various sounds from the gears to the many different music tracks for each puzzle are greatly improved. Although the puzzle takes a great deal of time to complete, the use of the control pad slows your progress and can make it frustrating. Needs a mouse.

This is simply an incredible puzzle game. I loved it the first time I saw it on the computer and was pleasantly surprised that the 3DO version was so much better. The sounds are great and the graphics are equally impressive. The only drawback is the control. As a mouse-driven game it works very well but as a controller game it is sluggish to move the pieces around. Puzzle fans who can get by the control will love it.

CD-I	Philips
7th Guest	
Puzzle	Release: New
Levels: N/A	CD-ROM

Philips accomplished what it was trying to do: it made the best version of 7th Guest anywhere. The graphics are good and the load time is much shorter than the PC version. The controls will keep you coming back for more. I love the spooky atmosphere and the live video is very well done. This is a must if you have a CD-I. The only downfall is the lack of replay value, but after you beat it, you can show it off to your friends.

Wow! If you've never heard of 7th Guest before, you're in for a shock. The graphics are simply mind-blowing and beautifully rendered scenes. The Staff mansion is a real thing around and plays a huge role at various points along the way. Just like the puppy we've all been hooked. The music and creepy side to the game so I wouldn't suggest playing with the lights off. A great game with no real replay value.

Wow! A game that is actually better than the computer version! The graphics are beautifully rendered to resemble the original. An intense story that will keep you on your feet your entire time on this interactive adventure. Definitely not a game for the whole family. Many adults are more for the mature audiences. Don't take a trip into the Staff mansion and experience the true horrors!

I've played it on the PC, and this is an incredible version. I love the PC version, but this is the king on the CD-I. The CD-I shows what it can do really well with the upgrade. The graphics are no less in what's to come. The graphics are truly amazing. As for the sound, it's really feel that you're in a house—very haunting. Also, not noticing the access time is a plus, and the story moves along smoothly.

Duo	TM
Godzilla	
Fighting	Release: New
Levels: N/A	CD-ROM

I am a big fan of rubber monsters myself, and this game was a great thrill for me. All of Godzilla's loss, except for the sea monster, and the ash monster has its own special grizz from the movie. The backgrounds are authentic. Many of the movie's characters, and the actual pure movie make me feel like being able to play as the Super X2. Versus Mode is fantastic!

I've never liked the Godzilla flicks and this game doesn't do much more for me. As it stands, it's a limited value game with a lack of special moves and bad control. The attack moves are the characters, though. The music and sounds are the highlights of the game. The graphics are almost nil so the game plays there. Fighting games are becoming too commonplace and this game is geared toward movie lovers only.

This is a new twist to fighting games. It's loaded with plenty of Godzilla's enemies as well as the famed Godzilla himself that you can fight with or against. The graphics are OK and the music is good. The Versus Mode is a plus, the only thing I didn't like was that there aren't enough moves, a little placed on the Duo's two button controller. Godzilla fans will totally dig this.

Fighting fans may not be impressed by the number of moves or the attacks, but if you play decent. The techniques look a bit like you are easy to control and the characters to a tee. This game appeals to monster fans more than fighting fans due to its great sounds and accurate portrayals of the characters. As a Godzilla fan I must admit to liking the look of the game but not so much the feel.

NES	Nintendo
Mega Man V	
Action	Release: Now
Levels: N/A	4 Meg

It was really hard to tell which Mega Man this was. It was pretty much the same as all the others, except this one was harder, and the graphics were plentiful. The 8-Bit graphics are finally wearing their teeth as the game plays bright, and there are lots of hidden places and stuff. The audio isn't as good as the previous NES carts. This as challenging, but after trying 16-Bit, it's really hard to go back to the good of NES.

OK, Mega Man was fun and original back in the days when the letters "NES" meant something. Now, the game is just getting redundant. Mega Man games may look like the new kids here and there, but the series has to end soon. The brighter side of things, the graphics have now deteriorated from previous five games and the music is decent for 8-Bit, but I'm on already, lets end this before it gets any worse.

No real improvements in this game over the previous ones. Even though it's just more of the same, it's still pretty to like about Mega Man. There are loads of huge levels to venture through and an increased difficulty adds to the challenge. Great for the game's grade. The music is OK, if you can still stomach the 8-Bit sound. I like the graphics which seem to be a bit more colorful. A great game!

If you like the previous ones then you'll like this one just as much. Nothing really new in this game but the fact that it's one of the best NES games ever should be enough. There is some as better, but there are new bosses and new powers. The graphics are as good as you're going to get on 8-Bit and the game play is top-notch. True it isn't a 16-Bit game, but it's as good as it is going to get.

Game Boy	Tiles
Lamborghini Challenge	
Driving	Release: Now
Levels: N/A	1 Meg

I love going fast, and Lamborghini Challenge has the speed most Game Boy titles dream of obtaining. Unlike most Game Boy's speed titles, this one is well. The burning tires and the cones. If that's a car as nearly impossible to drive. However, it plays decently. My biggest complaint is that it sounds like an arcade racer, and it gets all the dogs in the neighborhood howling. Still, one of the better racers.

Does racing across the country in a Lamborghini Diablo against other racers all competing for prize money sound like a fun game? Well, it is, especially when you get the eggs on your tail and win the entire race! The game suffers from a slight blurring problem, but it's not nearly as noticeable as other Game Boy games. This is a fun game to take on a road trip. Hey, if Dad drives like Grandpa, maybe the game could help.

Surprise! Surprise! I like this one. Durroo why! Maybe it's because it kept my attention for more than a minute. This racing game plays pretty good as any other, even though it's a little bit on the slow side. It is still a challenge. The cars are what you would expect from a Game Boy racing game. Also, like how you can win money and use that money to modify or upgrade your car. Pretty cool!

Hey, what do you know, I'm still playing these Game Boy games. Lamborghini Challenge is an excellent racing game. It will keep you entertained for hours or, besides, it's trying to cruise through the tracks. The graphics are pretty good in the sense of the game's capabilities. You may like to turn down the sound, it can get irritating. This game is quite impressive overall. Cool features.

Game Gear	Data East
Side Pocket	
Sports	Release: Now
Levels: N/A	2 Meg

The Game Gear was in need of something different, and Side Pocket appears to be the answer. The graphics are pretty much the same as the NES version. It plays the same. The graphics are pretty much like a good game, so you know what to expect. The trick shots aren't quite this game for me. It's too there's a measure puzzle game inside. A good game for relaxation.

Side Pocket is a decent transition from the Genesis version. All the cool Trick games are here as well as a few more. 8-Bit or Pocket are the same. Two players dishes up some great competition. The trick shots are probably the most challenging of the bunch, and the music is, too. The graphics are not the best, but the sounds begin to ring in your ears after a while. This is a great way to brush up on your pool skills.

This is a fairly amusing cart or some of the most popular billiard games. Although the graphics are on a par with the NES, it doesn't seem too bad. The graphics are actually distinguishable. The sound and speed is pretty good. I can't say I don't like the sound. Game play is good, except after you hit the ball. All the balls seem to roll a little too much. Kinda makes it less realistic. It's an amusing take-along game.

If you're a pool fanatic you'll love the control and options of this portable. Select from multiple angles and play styles. The graphics are basic but good enough for the system. It's a good strategy game where you can see the angle and shot and the ball effects don't play a role. In this cart, but the game play makes up for it. If you're on a trip, it may help to pass the time.

...Ho, ho, game friends, the Q-Mann is back, and better than before! They had the technology, now I'm stronger and faster—which helps when you're trying to get past CES security. There's plenty of good stuff this month, my Quartermanns, so in an attempt to quit wasting precious space, let's cut to the cheese and dig into the dirt... The adapter was as hot again, with both Sega and Nintendo throwing new add-ons into the ring. The 32X definitely K.O.'d the Game Boy peripheral, but the big N came roaring back with news on their upcoming VR system for under 200 bucks! Although this smells suspiciously like the Atari Cosmos system (play against holographic enemies on a table-top self-contained unit), the Q feels that the Nintendo gurus could possibly have something truly cool under wraps. From the word around the halls that yours truly has visited recently, the experience given off by the new machine is absolutely unique. We'll keep you posted... Once the Q-Mann got to his plush estate in downtown Naperville, a very unusual call came in from an undercover source close to a new device simply code-named "VR." You guessed it, the Quartermann scored big on another virtual reality machine now under development by either Hasbro or Mattel! According to the mystery man, this new gear will include a helmet and a mega-fast 32-Bit processor running at least four 3-D software packs for the intro in 1995...

...Still on the hardware circuit, look for a portable 3DO from Toshiba, with a built-in screen for on-the-go gaming! While sources tell the Q that Toshiba has their sights set for early '95, the hefty price tag that could be slapped on such a device may delay its marketing into the States... While we're on the subject of systems that cost Astro-Bucks, Pioneer is set to stick their LaserActive laserdisc system plus one console module for the low, low price of a single grand! Yep, that's right, now you can have a good lesser player plus some great games for the cost of two 3DOs. The machine's a blast, but that price is definitely an allowance-buster! ... Remember the Iron Man? It was going to be NEC's answer to the 3DO and other high-profile game machines, but it has been delayed (not listed as other reports have mentioned) while Hudson tries to sort out the battlefield to see who the dominant player is. If it's any indication, the company responsible for the classic PC Engine will soon sign up as a Saturn developer! What's the first game? Could it be Virtua Bank?...

...Back in the U.S., Acclaim is dead-set on getting MK2 on the streets in the fall. Both Probe and Sculptured have been given ultimatums to finish up all revs before the end of May so that the next Mortal (2) Monday promotions can be targeted for September or October. The games are finished and yours truly has looked at the Sega version and it's 24-Megs of major cool, with everything intact! ... While we're on the subject of Acclaim, their deal with Williams, which aced them classics such as MK and NBA Jam, has been ended. Their last consumer entry from the Midway stable of arcade hits will be NBA Jam Tournament Edition. Williams/Midway, meanwhile, bought up Tradewest to do the duties of bringing their coin-ops to life on the small screen. Look for Rare to be heavily involved with the programming and development of upcoming titles... WMS is also going full steam ahead with a coin-op version of Nintendo's upcoming Project Reality system... Also, Acclaim tried to soften the blow of their Midway divorce by announcing an alliance with Sega to get into the arcade biz riding on the big 'S' 32-bit hardware as well as their intentions to buy Valiant, a comic company best known for publishing new stories using other people's characters as well as those truly horrendous Nintendo comics that come out a few years ago. Remember Captain N? The synergy should be good for Acclaim, however, considering Marvel is going to start their own games division and pull back some of the licenses that Acclaim has done such a great job of promoting...

...Sega is really scrambling—so say sources inside the big 'S.' Now that they've got Nintendo on the defensive, all gears are moving fast-forward on 32X development. Unfortunately, it looks like they will be going it alone when the unit is unveiled to players during the holiday season since the Q has investigated and found that nobody has the 32X development gear. All of the up-and-coming European houses are signed on to do games, but none has a development system. Unless you see a flurry of quickie ports from other platforms, the first wave of independent sorts will likely hit in mid-to-late '95... Mega Man 7 is under development for the Super NES... Other news from the Sega R&D front—seems Sega is proceeding with their split cartridge concept and should have a flurry of poly games ready for X-Mas. I've seen Virtua Fighter being played on this and, even though it was slightly scaled back, it was hot... Time Warner now owns Tengen and has upped their stake in Atari Corp... We'll round out this issue on a high-note! Tengen and Nintendo have just done a deal: game and music up! Can you imagine the joy? Can you imagine the future? Can you imagine all the money in the lawyers' pockets...

PRESS START

SATURN LOOMS CLOSER!

The excitement over Sega's Saturn system keeps on building as more and more news on this powerful system hits the press on a continual basis. The look of the preliminary Saturn system was shown throughout Japan, but the colors and design of the U.S. version could change at Sega's whim.

Everyone has been wondering what kind of support the Saturn would be receiving. Trying to get you the news as it comes, we went directly to the source: Sega of Japan.

So the future of the Saturn looks to be ensured. With its big name licensees, it will be interesting to see the first wave of next generation Sega. Still no news, however, on whether or not it will be compatible with the 32X system yet. That's another question which is on everyone's mind.

As the latest news reaches us, we'll be there to pass it on to you. Keep reading these pages in EGM and EGM* for more. The Saturn is closer than ever to reaching our stores.

Sega showed the media a preliminary version of the Saturn.

Sega of Japan announced six major licensees for their Saturn. They are Capcom, Namco, Konami, Taito, Hudson, and Bandai—all of which have not been able to comment on what they are developing for it.

Other companies that have signed on the Saturn bandwagon include, Game Arts (of *Sphinx* fame), Planning two games), Koei, Sunsoft, Sains, Data East (planning two games), Danpa Shunbunsha, Treasure (Gunstar Heroes and Dynamite Headdy), and finally Victor Entertainment.

As you can tell from the picture, Saturn will have both a CD Drive and a cart slot.

The Saturn looks like it will be a hot item when it is finally released.

32-BIT NINTENDO!

Next spring, Nintendo will release a new game system that offers virtual reality (VR) applications. As opposed to current VR systems, the new system will not require the use of special glasses. The new system will be driven on a 32-Bit chip and use special software. President Yamouchi claimed, "The system will open up a new field of entertainment," which is said to be unlike traditional video game systems that are connected to TV monitors. Nintendo intends to build up the new system as a strategic product to follow the Famicom and Super Famicom.

The new game system is presently in its final stages of development. It will be unveiled at the new software show to be held in Tokyo in mid-November. Believe it or not, the new system price is claimed to be under ¥20,000 (\$180). The software will be priced lower than SFC software. It is believed that Nintendo developed this system to counter Matsushita's 3DO REAL and other systems that are causing greater competition in the market.

Nintendo will be the first company to offer VR at a price below ¥20,000. President Yamouchi also stated that the new system will provide, "Super VR for experiencing virtual reality with using an HMD (head mount display)."

As Nintendo is jointly studying and developing video display technologies with an American company, it may be possible that this system may use projection technology.

This bold new step may once again put Nintendo ahead of the pack.

INTRODUCING VIVID3D. THE ULTIMATE IN GAME SOUND.

Get ready for the most realistic game adventure ever. The VIVID 3D™ sound enhancement system from NuReality transforms ordinary game sound into an amazing 3D sound experience. ⚡ What does "3D sound" mean? It means game sounds come alive all around you. It means you feel like you're in the front

NUREALITY

SONY'S PS-X: FIRST GLIMPSE AT THE FUTURE!

One system that has a lot of mystery surrounding it is the Sony PS-X. Sony has been very secretive in terms of software and games. Until now.

Scheduled for release sometime this November in Japan and September next year in the UK and the U.S., the PS-X is drawing a lot of attention.

The reason for such a delay is

Sony has announced that we can expect to see the PS-X and at least 20 of the games at the next Chicago CES in June. The games, when released, will cost between \$30.00 and \$60.00.

So this year we can expect the first real look at the PS-X in action, complete with its slew of first generation games. Sony seems to have a sound

“...In the U.S., we still do not have a defined company for distribution of the PS-X, thus there has been no communication about it.”

Europe and America is

simple. Sony wants to give the developers ample time to produce games that aren't hurried or rushed. Its retail price is expected to be under \$400.

By the end of this month, European developers can expect to receive development systems.

Aside from leading firms like Sensible Software, Probe, DID, BITS, and Argonaut Software (who have signed up with Sony) big-time video game publishers are preparing software for the PS-X. These include Capcom, Konami, Namco, Ocean, Acclaim, and Electronic Arts.

It will be interesting to see whether or not the PS-X can win the systems war.

plan. It will be interesting to see the public's reaction to it.

These pictures, from games that are in progress, show the PS-X's capabilities.

The PS-X features lighting test video-like graphics for awesome effects.

A NEW PLAYER...!

The latest word in the video game market seems to be from the toy industry. It appears that one of the major toy companies is possibly planning to release their own video gaming system. While we do not yet know which company (the information has yet to be disclosed), three major players were mentioned: it could be any one of them. Those mentioned were Fisher Price, Hasbro, and Mattel.

While this information is rather vague, the specifics on the system itself are still up in the air as well. The new system, has no tentative name and no statistics other than that it will be 32-bit. The system is to be CD-based, will come with a VR helmet and controller, and have a game packed into it. The price they are aiming for is \$499.00. More news on this as it hits.

PORTABLE 3DO!

Toshiba, known for its consumer products and manufacturing of communications goods, has signed an agreement to market, manufacture, and distribute 3DO products. Toshiba will bring out the 3DO in the UK, along with a special portable 3DO on the horizon. The first version will not have a screen, but the second one, also in this work, will come with a screen. The portable can also be installed into automobiles.

Imagine: playing Jurassic Park interactive wherever you want! If you want a portable 3DO, your wishes have been granted. We will cover this one as soon as we get the information. It's a real treat for 3DO owners.

SONIC 4 FOR GENESIS COMING THIS FALL!

EGM has learned from sources at Sega that they will acknowledge the existence of a new Sonic game at their Sega Show being held in Orlando at the end of May. This new Sonic game will come out later this fall.

While this is not a big surprise, as Sonic is Sega's mascot and each new game featuring him almost guarantees several million cart sales, this version, Sega states, will be "extra special!"

The idea of having three Sonic games (Sonic CD—November 1993, Sonic 3—February 1994 and Sonic 4—September 1994) in less than one year would obviously tax any development staff, so if a fourth game was to come out this year, one would seriously wonder how Sega could do anything special in the limited amount of time available. But they will—Ed has the complete details and he won't tell anybody. Seems that Sega has a gag order on him and he can't talk about it until later this summer.

It all started back at the winter CES

Could these early Sonic game screens be windows to the Sonic 4 mystery?

Ed found out about a new Sonic game in a routine interview he was conducting and when things didn't add up, he probed deeper into SoA (America), SoJ (Japan), and SoE (Europe). In doing that, Ed discovered one of Sega's top secret projects. What is it? All he would tell us is that he has been dropping subtle hints about the technology through his articles over the past several months.

What can he say?

"The future is tied to the past."

"By looking at the level select screens for the past Sonic games, an astute reader can see what the Sonic programmers have been up to. From this information, one can predict the future. Sonic 4 will do something that no other cartridge game has ever done before."

We don't have a clue as to what he is talking about, but if a reader can do the required research and solve the mystery we'll be eternally grateful.

More next month!

The key to the Sonic 4 secret lies in the Level Select Screens like this one!

PLAY NES ON SNES!

A company called Fire International LTD. has made a way for you to play NES games on your Super Nintendo. Using a special adaptor that plugs into your Super Nintendo, all you have to do is pop in your old 8-Bit Nintendo games. The Tr-Star, as it's called, can play Famicom games as well, since they play the same way. It costs about £39 and it's already available to consumers. Just what the NES enthusiast ordered.

Choose between 8-Bit and 16-Bit with this on-screen chooser.

The Tr-Star is already out. Now your Super NES is more versatile.

This new NES to Super NES converter lets you play your 8-Bit games again!

SUPER STREET FIGHTER 2 COMING TO THE SUPER NES IN JULY!

EGM has been able to obtain from Japan early screen shots of the Japanese version of Super Street Fighter 2 for the Super Famicom (Super NES in America).

Preliminary information places the Super NES version of the game at a whopping 32 megabits, double the amount which was allocated to last year's version of Street Fighter 2 Turbo. This extra memory is evidently needed for all of the graphics and animations for the four new characters (Cammy, Dee Jay, T. Hawk, and Fei Long) in official at

Capcom U.S. states that this new version will have "... extra game play that is not in the arcade." This could mean more options (as we saw in the Genesis Champion Edition vs. the Super NES Turbo version last year), or perhaps new secret moves.

One thing that we hope Capcom will include in this game is a speed setting. The arcade game was horribly slow, and at least by giving the player a choice of speeds to choose from

Here it is! The first picture of the long-awaited Super Street Fighter 2 for the Super Famicom/Super NES! It's 32-Meg and should be coming in June/July!

(either in the option screen or hidden in a trick code), then the home version won't suffer from the same problem. While we're wishing, having multiple endings, as found on the last home game, would give players even more incentive to strive to get that "best" ending. Unfortunately, our gut feeling is that since the megabit count is up so high already, the multiple endings just might be the first thing that is cut out in order for the game to fit into 32-Meg.

While an official release date has not been confirmed at press time, June 26 is the tentative in-store date in Japan for, at least, the Super Famicom version. Since the Mega Drive (Genesis) involves such a small percentage of the Japanese game market, that version could come out up to a month later.

The best guess for the U.S. release would be sometime in July as Capcom has not been able to do a worldwide simultaneous release yet. The U.S. has always lagged behind Japan by at least one month.

As to the price, the extra megabits

won't come cheap. Early information places the suggested Japanese retail price at \$100 (¥10,000), but considering the current economic conditions over there, that price could quickly drop down to about \$60. If this is any indication of what a 32 Megabit game must sell for, the U.S. copy could hit the \$80 to \$85 bracket also.

When contacted, Capcom U.S. would not disclose specific prices or details about this game.

They did say that the game would be available for a Fact File in the July

issue of EGM. Assuming no major setbacks on Capcom's end, look for a full-blown Fact File next issue!

With a speed setting the action really could heat up, just like in the arcade!

The background effects in Fei Long's stage have been faithfully retained.

NEW PROGRAMMABLE JOYSTICKS AND JOYPADS FROM QUICKSHOT & COMP. PRO

COMPETITION PRO:

Tired of having to buy a separate controller for each home system? Well, Competition Pro's Multi-System 6 (from Happ Controls, Inc.) joystick is compatible with both the Super Nintendo and Genesis systems! The controller is loaded with functions: two turbo speeds, slow motion, and a 6-button Genesis compatible. The controller uses a Super NES/Genesis plug adapter to switch between the systems.

The Competition PRO joystick is compatible with Genesis and SNES!

Competition PRO has a similar controller for the Genesis system only. Called the Professional Control Pad, it features many of the same functions as the Multi-System 6, except it doesn't have buttons on the top left and right sides. For Genesis 3-button only fans, there is also a Professional Control Pad with only three buttons that also has turbo speeds on each button plus a slow motion function. All three joysticks come with a one-year warranty. For more information, contact Happ Controls, Inc. at (706) 693-6130 (fax 1-800-693-HAPP U.S. only).

For the Genesis only, Competition Pro's Professional Control Pad.

AND FROM QUICKSHOT

For more of an arcade feel, Quickshot Technology, Inc. has three new joysticks available: two are for the Genesis system (the Conqueror 3 and 3+3) and one is for the Super NES (the Conqueror Z). These joysticks feature programmability, slow motion, turbo speeds, 270 degree rotatable fire buttons, and suction-cup mountings. They also have battery (AAA batteries)

back-up to store certain moves.

The Conqueror 3 and 3+3 is 8-button compatible, and can store up to seven steps into one sequence move. For example, in Street Fighter 2 Special Champion Edition, Ken's Fireball has a total of three steps (moves that require the pressing of a button are not counted as a step).

In addition to programming moves that require specific joystick motions, you can also configure the controller so that moves that require multiple buttons to be pressed

The Quickshot 3+3 joystick has programmable moves and other functions.

can be set to one button (for example, Zangief's springing clothesline that requires you to use two punch buttons simultaneously can simply be done with one).

Programming moves, though is somewhat tricky, and you should read the manual very carefully to learn how to do them.

As the Conqueror 3+3 and 3 are 8-button compatible, the Quickshot 3 (only for the Genesis), on the other hand, is only 3-button compatible, and in the Program Mode, button depressions are counted as a step.

For those of you more accustomed to joypads, Quickshot has a new joystick—the Super Pro Super Nintendo Control Pad. This peripheral features turbo speeds on all the buttons, in addition to auto fire. For more information on Quickshot products, please call (510) 490-7958.

ARCADE ACTION

DAYTONA USA by Sega

Greetings arcade junkies! As you will probably remember, a little over a year ago Sega released Virtua Racing in arcades everywhere. Needless to say, it was an instant favorite of racing fans everywhere. A few months back, Namco took racing games one step further with their highly successful Ridge Racer. Now, Sega has unleashed Daytona USA, and the stakes in the arcade wars have been raised again!

Daytona USA features some of the most realistically rendered racing action to ever hit the video game

scene. Like Virtua Racing, players can switch between four different viewpoints for greater control of your vehicle. There are three courses to choose from: Daytona for the beginner, Grand Canyon for the intermediate racer, and a Seaside course for the more advanced driver.

Up to eight people can play, and you'll absolutely love the huge 50-inch screen which gives you the feel of actual Daytona-style racing. Also included is an "Opposite Direction" feature which allows you to spin a full 180 degrees, and watch your opponents come right at you!

As far as racing games go, Sega's Daytona USA is as close to reality as you can get without actually risking life and limb!

Steer clear of your opponent's car or you may end up as a smear on the track!

You can pick between three courses depending on your ability and stamina.

On-the-fly switching lets you choose between four different perspectives!

All of the vital information that you will need is shown right on the screen!

The courses are all beautifully rendered (notice Sonic carved into the mountain).

TOP HUNTER by SNK

Roddy and Cathy have their hands full with this Boss from SNK's Top Hunter.

Roddy and Cathy can hurt charged energy belts at their enemies.

Each of the four different stages presents new challenges for our heroes!

Uh-oh! The Klaptons are on the loose and piloting pesky settlements. Don't despair, because Roddy and Cathy are intergalactic bounty hunters, who are out to save the colonies from these nasty space pirates!

The game: Top Hunters. The company: SNK. The action: Heavy-duty! Top Hunters is the latest action installment

from the good folks at SNK. This game is not only a lot of fun to play, but it really lives up to the SNK tradition of awesome arcade action/adventure games like *SpinMaster* and *Wings of Lord*.

You can play either a one-player or two-player game. The heroes, Roddy and Cathy, have unusual powers to help them defeat the Klaptons. Roddy can extend his arms to grab enemies and toss them at other enemies. Cathy, on the other hand, can extend her

"Chain Sauser" to grab enemies and items. There are power-ups to get, and the enemies are really cool (not to mention the Bosses, who are very, very wild!)

Check out Top Hunter if you're in the mood for an action game that will put a smile on your face, and suck the tokens out of your pocket!

The Bosses (like this one) are very imaginative and deadly as well!

GRAB ENEMIES WITH YOUR EXTENSIBLE ARMS!

Choose between these four planets and get ready to start your adventure.

Our heroes can extend their arms to grab enemies and get power-ups.

Players can jump back and forth between foreground and background.

INTERNATIONAL NEWS

I don't know really what to say in this playful little column this month. I've traveled from Osaka to London and back to get you information about the games that are likely to be covered here in the International section in the next few issues. So in a sense, it's like a sneak preview. Got it?

Due to the amount of pages devoted to my section, I've been forced to cut out the side bars detailing what's going on in the International scene. But don't worry, hopefully it'll be back in the next issue.

Despite the sheer amount of work involved, I managed to survive both CSG and ECTS.

At the CSG, Natsume had a hot new shooter, and several of the companies had some really snazzy anime-based games.

London was a bit different. Rather than just deal with video games, computer games were also featured. I tried to search out the games I thought you'd want to see. Speaking of which, Konami has two hot new games for Super NES that I've got in the ECTS section.

Anyway, it's about midnight and I'm taking a 30-over-night nap, trying to keep my eyes open. Whew! Yet another issue finished.

Release - July

Price - N/A

The latest installment in Sega's fantasy tactical RPG series is actually a coupling of the Shining Force Gaiden and SFG2 which came out for the Game Gear. In making the jump from portable to CD-ROM, the two games have been entirely reprogrammed with vastly improved graphics, sounds, and enemy intelligence routines. It will essentially be a two-in-one game with extra special graphics.

The Japanese word 'Gaiden' translates as 'side story'—although related to the main story of the series, it does not actually constitute a part of it. For example, Shining Force Gaiden covers on adventure undertaken by the children and siblings of the heroes

When monsters take over a town, it's up to you to strategically strike them down.

from the original Shining Force.

I'm hoping it will come out here. We sure could use more of these kinds of games that challenge the brains and not the reflexes. The original Shining Force did well. Why not bring it out over here?

Like before, the battles are played out using detailed graphic cinemes.

When you cast magic, the entire screen is submitted to its effects!

Use military tactics to turn the odds in your favor. They work well.

RPG

Release - June

Price - N/A

Close to two years after the original release date, Nintendo's first RPG for the Super Famicom finally appears to be nearing completion. Japanese fans have waited a long time, but it seems the wait has been worthwhile.

Unlike typical swords and sorcery RPGs in medieval settings, the series is set in modern day in an imaginary country which appears to be very much like America. But things are not all that normal. Geeg, a strange being from outer space, has infested the land with strange beings who make monsters out of ordinary bugs. Ness, the young hero, and pals travel on a journey to thwart the evil Geeg.

Fight the bugs that have been turned into vicious horrible monsters.

This game is set up in the same manner as most role-playing games.

The 3-D arcade shooter, under development by Success, will be coming out under the Sunsoft label. It's based on a very cute arcade shooter with a 90 degree twist.

Play as Cotton, a young witch in training, who must get aside her flying broom to fight the hordes of evil beings set loose on her world. Helped by the fairy, Silk, lots of magical spells can help take out the bad guys.

The screen scrolls by in a 3-D perspective to add a new dimension of game play.

Cotton and Silk must brave dark caves and a multitude of scary enemies.

Cotton's latest adventure is visually awesome.

Here's a neat concept in action games. Goomin is a young boy who must rescue his grandfather from a nefarious witch. At first, he has to do all his fighting with a large sledgehammer. However, by beating stage Bosses, Goomin picks up animal outfits that give him special powers. With interesting game play, arcade graphics, and the cool strategy of the suits, Goomin looks to be a hit!

Bow, the canine hero of a popular Manga and anime series (who resembles Spike McKenzie), makes his game debut. The game is very simple—it's your basic air hockey type setup with added pinball features. Score more goals than your opponent and you win! For variety, players get to choose main characters from the anime, each with different skills and attributes. The rackets can be replaced with shovels, baseball bats, and other handy tools for hammering wicked line-drives and special attacks (which are plentiful).

A simple game, sort of like Pong for the '90s, but with enough spice to keep it interesting and fun. Fans of the anime and younger players should have a blast with this one. I bet you never heard of Bow or his tales before! Check this one up to the growing anime-based games.

You say you want a 16-bit REVOLUTION!

IT TAKES A LOT to start a revolution and even more to make it successful. After all, you need guns, money and leaders who can rally the people. In Koei's newest strategy game *Liberty or Death*, we've supplied you with these basics plus a few really cool extras.

It's THE SUMMER OF '75 and the colonists in America are fed up with British rule. As George Washington — Commander-in-Chief of the Colonial forces — here's your chance to relive the great battles of the American Revolution.

It's up to you to raise the funds needed to supply your troops, build forts and forge new weapons. On the tactical side, launch battlefield attacks or damaging guerrilla ambushes to inflict

the most damage on your British counterpart, Thomas Gage and his army of Red Coats. You can also take control of the seas with your fleet or dispatch line boats to wreak havoc on the British Navy.

The small of revolution is in the air!

- ★ Lead British or Revolutionary Divisions
- ★ Choose George Washington or Thomas Gage as Commander-in-Chief
- ★ Use your Fleets to gain control of the seas
- ★ Experience historical events as they happen
- ★ Call on your advisors for words of wisdom

The folks that brought you the superb Pocky & Pocky shooter have come up with an entirely new kind of 3-D shooting action game. Unlike standard 3-D shooters (where all you see on the screen is your gunsight or your aircraft), this Wild West action keeps the player-character on screen (a cowboy named Clint or a cute saloon girl) together with the gunsight. That means you must keep your character moving, while still trying to aim your own gunsight.

Don't worry, it's not as tricky as it seems. In fact, it's a lot of fun, especially if you get a friend to join in on the mayhem.

Since this game is so cool, we'll try to bring you more information on this unique kind of game in the next issue of EGM, so stick around partner for what looks to be one of the hottest shooters in the West. (err... East)

This is the latest addition to the long and still growing list of fighting games based on popular anime such as Dragon Ball Z, Ranma 1/2, and the Fist of the North Star series. Unlike chiseled conversions whose only saving grace is the use of anime characters to suckle hapless fans (hello, Fist of the North Star 7!), Namco has made sure this game will be able to stand on its own merits. Each fighter has been endowed with four basic punches and kicks as a start. After that, every character has four moves requiring tricky controller movements. Better still, everyone has a super power mover that they can only do when their hit points are close to zero and their spirit meter is fully charged.

Even if you don't know the anime, this game provides plenty of entertainment value. It even has decent graphics to back up the game play.

Some of the special moves are truly awesome to see in action.

Even if you haven't heard of the anime, you'll like this wicked fighting cart.

J. League, the Japanese pro-soccer league, kicked off its second season in great style with sell-out crowds guaranteed for every match into August. Namco, being the first maker to release an official J. League game with full rosters, scored a huge hit with the original Prime Goal last year. The sequel is shipping up to repeat that success this summer. The team rosters have been changed to reflect their real teams, which includes two new teams. The game has been made much faster for wider, speedier action. Player substitutions and formation changes have also been added in for purists.

With World Cup fever nging over here, it would be nice to see this translated as a World Cup game.

The action is fast-paced and very intense. Not for the faint of heart.

While I quite haven't figured out why they call it sensible yet, this soccer title was one of the more interesting ones at the show.

Not only is it on Mega CD, where sports games are kind of rare, but it also has many more options than similar titles.

From the very start, it contained that "soccer" feel with full-motion video. The on-screen players, which were seen from a bird's eye view, seemed a little bit too small. Still, the action moved very fast.

Like I wrote earlier, there are a great number of options—so many in fact that I can't even begin to summarize them here.

Soccer games on CD? Doesn't happen very often, so I guess this is one you'll probably want to see. Overall, not too shabby.

For example, there's a weightlifting event, a target range (using Monty's head as a target, right I add), and even a 3-D Mode 7 hang gliding event that's sure to have its ups and downs.

Though the picture quality of these photos are bad, the game really does look great. It would make a terrific addition to the line of Tiny Toons games.

The beginning is quite simple. It all starts out with Tina Branford and two Gastorle Empire soldiers. They are on a mission to crush the Resistance, and acquire a mythical beast that is encased in ice. It sounds easy, and you are only following orders ... but something seems wrong.

THE GOOD

Everything. This game gets a 10 in my book. It's huge, beautiful, in-depth, and sounds terrific.

THE BAD

Your social life after you get this game. Once you start, you won't quit till the game's won.

THE UGLY

Your body after you don't get up to get food or go to the bathroom. You'll be glued to the screen.

TINA
BRANFORD

Controlled by the Empire, this heroine soon becomes important.

Find the frozen monster. It'll knock out Tina.

Tina (while unconscious) will have flashbacks about her past.

The legend of the Final Fantasy series continues in the sixth installment of the saga.

The evil Gestahlian Empire is trying to crush the people of the land, and they do not care what they have to do to accomplish their goals. They have already subjected their own people to mind control devices, and they enforce their iron will with magic-powered mechs.

Final Fantasy VI is the story of the people who are trying to put a halt to the evil permeating the land. It will be a very personal journey for each of the mighty warriors. Some are seeking honor, others revenge.

This huge 24-Meg cart boasts some of the most amazing graphics ever. The soundtrack is better than anything we've heard before. The story is long and convoluted, plus there's so much to explore.

It will take time and effort to save the realm, and perhaps some sacrifices. No matter how you look at it, you'll be in for a great adventure.

She's saved by an old man, but she gets captured in the caves...

A noble king who is secretly supporting the Resistance. He can use guns!

An agent of the Emperor, Kefka discovers Edger's treachery, and demands Tine or the palace will be set aflame. The noble King refuses and the castle is soon on fire. Edger orders the palace to sink under the sand while he, Lock, and Tine escape on Chocobo. Then they are pursued by mechs.

SANDOON!

After going through a small cave, the party ends up in the town of South Figaro. It is here that they will first meet the elusive ninja, Shadow, and his dog, Interceptor. He won't join them yet. From here they must work their way to the secret Resistance headquarters.

MOST WANTED TRICK

This month's Most Wanted Trick is for the awesome game, *Super Metroid* for the Super NES! There is a rumor that you can play as Samus without her armor. If you own a Nintendo and played the original *Metroid*, you may recall that there was a code to play as Samus without the Power Armor. This was commonly known as the JUSTIN BAILLY code. Could a similar trick also be in the Super NES version? Many people are wondering if this trick existed if you can confirm any truth to this rumor, send it in! Please do not send in bogus tricks, as these are a waste of time (the Trickster hates those). Also, if the trick exists and you find it before we do, you'll get your name in our awesome magazine. Also, you will win a free game for the allowable system of your choice! (See page 98 for details on allowable systems.)

Find the Secret Hidden Level!

Make sure you have double zeros in your score to get the hidden level trick to work. Collect all of the diamonds.

A method has been discovered to get a hidden stage in the action-packed game, Mega Turrican. This is how to do it: Go through the first stage and collect every single diamond. If you leave any diamonds behind, the trick will not work. Throughout the game, you must make sure that the last two digits in your score are double zeros (00). When you get to the elevator that travels down, don't shoot any enemies, or your score will change. Just avoid your foes. You must make sure that the final numbers in your score are still zeros. Once you reach the bottom, just run to the right, and you will have access to the hidden stage! You will be able to collect diamonds, power-ups,

1-Ups, and much more here. Once you find the elevator in this stage, you will go to the next part of the first stage as you normally would. Once you finish the stage, you will get extra bonus points for all of the diamonds you collected, etc. This is a cool trick for those players who just can't get enough of the Turrican series!

Go into the first level and collect every single diamond.

Take the elevator and make sure you have 00 in your score.

Once you get off the elevator, you will be in the special stage.

11 GAMES PREVIEWED!!!

Snatcher, Cyber Slider, Pitfall 2, Monster Max, Wild Snake, Revengers of Vengeance, Fievel Goes West, Brutal Sports Football, Flashback, Double Dragon V, Blue Lightning

NEW SOFT NEWS

You know, it's a word banding ad when you think about it. Last month there were literally no Jaguar games to be found, and now we're drowning in them. It seems that the companies are finally releasing their software for it. And there are some big-time games for it too. The ever-intriguing Flashback, and the addictive Wolfenstein 3-D are now available. Tridion, at even has their Jaguar version of Double Dragon V up and running. The fan may sleep tonight, but the Jaguar certainly isn't.

Another bit of interesting news is that the game called Battle Fantasy, which we showed you an issue or two back, has been renamed Revengers of Vengeance.

As you can tell by looking to the right, Konami will be releasing Snatcher for the Sega CD. That's great news, but it makes you wonder what else they have planned. Look toward the ECTS section for a game called Sparkster which uses the Rocket Knight hero (and a brand new Tiny Toon) of the CD. It's a look-see!

That they will be coming to the States. Until next time...

Snatcher

Sega CD

Adventure

Konami's been busy porting this over from the PC-Engine Super CD to the Sega CD. Now Sega CD players are in for a real treat.

You are Gillian Seed, a bounty hunter searching for robots who kill human beings and then impersonate them. You are a member of Snatcher, the group best known for hunting these menaces. As the plot unravels, you will be making friends and enemies. Your partner is a Metal Gear (Do you remember the old NES game?) It can do many things, like help you out in the forensics department. To hunt down the deadly droids, you must keep an eye open for clues and the occasional ambush.

Snatcher is very reminiscent of the movie Blade Runner, with more than just a few coincidences in the character design. The puzzles are very well thought out and the graphics are beautifully animated. The colors are also surprisingly bright. The audio is good enough to sink your teeth into as well.

Thank goodness Konami had the sense to translate this one for the Sega CD. It's been at the top of the Japanese charts, and it'll probably do the same here. Just a word of caution: this game is for adults only. It contains

Puzzle

It's a puzzle game where poisonous snakes are being piled up. If you can match two of the same kind, both will disappear. But if you keep messing up, the snakes will attack you!

There are different backgrounds that affect the game play, plus cobras that devour any snake unfortunate to get in its way. And something ultra-rare, is the Wild Snake that makes all of a specific snake disappear.

Like most puzzle games, this one shines when you have two players fighting it out. Send snakes to his side as the action heats up.

There's more strategy here than Tetris and the graphics are quite cool. If you need something to stoke your thirst for brain-bending fun, then Wild Snake is for you.

Try to keep the snakes from reaching the ceiling or else...

You can send more snakes to your opponent in the two-player mode.

Fievel Goes West

Super NES

Action

Based on the animated film that hit a while back, you play the part of an immigrant mouse who has a taste for adventure. Fievel decides to travel to the Wild West to save his family from the cunning Cat R. Waul. He's armed with a simple water pistol—that's it. Will it be enough to survive the many dangers ahead?

The Mousekewitz family is facing its worst crisis ever. Fievel knows his folks are about to be turned into mouse-burgers, so he'll do anything to save them. The little mouse has to go through Western towns, on giant mine cars, and to the relentless desert. Can Fievel prevail?

The mine cart ride is one that is surely going to thrill you with its action.

Vultures sit around waiting for you to croak a mouse's death. Mew, uschi!

Giant Bosses bound about trying to smash Fievel flat as a pancake.

NEXT WAVE

THE JAGUAR CD-ROM...

Recently, we were able to see an early version of the Jaguar CD-ROM and boy did it have a few surprises! First off, it is compatible with the Cinepac compression system, so you can watch movies with it. Unlike the 3DO, which can only display 20 frames per second max at a video size of 160 by 180, the Jaguar can have up to 50 frames—a clear-cut difference. A CD using Cinepac can have one to three hours of footage, depending on the material shot. While movies on CD may be nothing new, the Jaguar CD can also have audio and video collision, so you will be able to effectively interact with the video. That is something that has never been done effectively before.

Also for the Jaguar CD, you can plug in a special MPEG cartridge and watch the CD movies that are currently compatible with the Philips CD-I and Amiga CD. MPEG seems to be quickly becoming the major format for CD movies. So not only will you be able to use Cinepac discs, but those that are MPEG. MPEG is about half a notch below quality of VHS and Cinepac is about one. Not much of a difference.

Here's the special compression card that lets you watch CD movies.

Here it is—the Jaguar CD-ROM system with the compression card.

Shooter

The classic Lynx game has gone 64-Bit! Fly a heavily armed fighter deep behind enemy lines to accomplish missions of the utmost importance. Tanks, planes, and ground-based missile systems will try to blast you out of the air.

The graphics are unbelievable, and are among the best for the Jaguar. The many canyons, rivers, and jungles are wonderfully detailed.

This update shows off what the Jaguar can do. Makes you wonder what other Lynx titles will appear.

Fighting

Billy and Jimmy Lee return in the latest installment in the Double Dragon series. Unlike before, this is strictly a one-on-one fighting game. It's based on the popular animated series and all the fighters are appropriately cartoon-like.

Each fighter is loaded with special moves. There are also dozens of backgrounds to choose from. The Jaguar version features graphics that are particularly impressive.

If you liked the earlier Double Dragons, look out for this one.

Ever since *Sta-Fox* came out for the Super NES, people have been screaming for a new Super FX game. Now it becomes a reality with the introduction of *Stunt Race FX*. Originally titled *FX Trax*, this cart takes racing to a new height with the Super FX. First, the cars (which look like goofy cartoons) are made up of different sprites, the wheels, eyes, and body are segmented and separate from each other. There are also quite a few races you can try out for times and try to beat the previous records—similar to the style of *F-Zero*. There are also stunt tracks that you can try by your skills on, 3-D racing at its best!

Easy Ride

Easy Ride is just as it says. Pass by houses and trees and practice your skills so you're prepared for the later tracks. There will be many hairy turns, so lean to use your turbo boost before you go to later tracks.

In the beginners track, you will learn the basics of harnessing your much needed driving skills.

Sea Breeze

The Sea Breeze is definitely a unique track. Cruise through underwater tunnels to emerge on the surface and fly under porpoises that are leaping over the road! This level is definitely original and really a blast to see!

This cool scene is what you will see when you drive through the underwater glass tunnel support.

Under the night skies, you must drive through underpasses and avoid ramming into gates.

Night Cruise

As you go sliding through this city-scape, you'll tuck under bridges which you will need to drive over later. Sharp turns can lead you into a mess of trouble with a steel gate slamming into your face!

Above, guide your truck through a series of cross gates. To the right, you must frudge through the water and leap over ramps.

Stunt Trax

Utilizing the 3-D processing, you can truly experience the thrills of all kinds of crazy stunts! Everything from jumping from ramp to ramp to doing flips on giant, wobbling cones is here!

Above, fly over hills and collect stars. On the left, floor it around the wobbly cones and try to do some mega flips.

The rest is the famed Double Dragon fighting series is here, Double Dragon V. The Shadow Falls features 12 fighters, including Jimmy and Billy Lee. Many of the new characters were created especially for this game, while others are based on characters from the animated series.

You will be able to select several modes of play, including the Quest, Versus, Tournament, and Battle Modes.

All these are provided in the Main Menu Screen. You can even choose to view all the characters in the game and see their stats, which include their date of birth, origin, likes, and dislikes.

As with all fighting games, there are loads of special moves that you can execute. Word from Tradwest is that there are even some "knockout" blows to finish off a defeated fighter. Looks like a great title from the folks at Tradwest.

FATAL FURY SPECIAL

Vas, it's finally being made for the Super NES! And it's just a matter of time before it will hit American shores.

The whole Fatal Fury series is excellent, and this upgrade to Fatal Fury 2 is the best yet. The translation to the Super NES is very precise regarding the moves and the graphics of the stages. With Dolby Surround Sound added into this already awesome game, the voices,

attack sounds, and especially the background music come to life. There's more! Remember Geese Howard, Duck King, and Tung Fu Rue from the older versions? Well, now you can choose them as a regular fighter against the other 12 characters. With the game play speed-up, the movements of the characters are much faster and you can do attack moves and combos with more precise timing. Consider this one of the best fighting games of the year. Too awesome!

THE GOOD

All 15 characters are at your disposal. The kicking sounds are a plus for this one.

THE BAD

I bought the Neo-Geo version, and now I need money for this one.

THE UGLY

Axl Hawk throwing you on the electrified ropes will really make your hair stand up.

Terry Bogard Andy Bogard Joe Higashi

Terry is ready for another round with anybody willing to taste his fists and experience his other lethal moves.

Being Terry's brother, he has the same ambition—to defeat Krauser and anyone else who gets in his way.

Joe Higashi has joined the Bogard brothers once again to help them fight against Krauser's minions.

Mai Shiranui Jubei Yamada

Pretty as she can be, Mai delivers as much damage as the big boys can. Her moves and combos are definitely faster than the rest.

The little old man with the cookies is back with his tricks. For a small man he can be surprising with his lethal hold moves.

Big Bear

The huge wrestler is back and meaner than before. His moves are much faster and he can inflict heavy damage on opponents.

Kim Kaphwan

Trained in Taikwondo, Kim Kaphwan is very quick in his offense and defense. His kick combos are vicious!

Cheng Sin Zan

The overweight fighter has greed written all over his forehead. He's quite a slow fighter, but lethal with his fireballs.

Billy Kane

Fire is in his eyes to defeat the Bogard brothers once and for all. He hits opponents using his pole, which he can extend.

Axel Hawk

Axel, a heavyweight fighter, seeks vengeance against the Bogard brothers. He's very dangerous in the ring. Watch out for the ropes.

Lawrence Blood

The bullfighter, Lawrence Blood, shows no mercy to his opponents. In his stage, he will take advantage of the bulls in the background.

W. Krauser

The last Boss in Fatal Fury 2 is back. This time he is more prepared with his attacks. He will throw fireballs at you without mercy.

Geese Howard

Feel the power of Geese's attacks and combos!

Duck King

Dancing boy has some royal moves.

Tung Fu Rue

The old man has some tricks up his sleeves.

Just when you thought your hands could go home... the sequel to the ultimate party game Super Bomberman is here!

Featuring all new techniques and power-ups, not to mention a larger playing field, Bomberman 2 is everything the first one was and more! There are tons of cool new features like the ability to pick up your own bombs and toss them over walls and other bombs, and turning your

bombs into rubber so they can bounce off walls or other bombs when you kick your bombs into them. Returning power-ups are the already mentioned kick ability and the detonator.

Invite your friends over and get ready for some serious bombing. There are 10 new battlefields, some with warps, conveyor belts, and underground tunnels. There is even a cool Tag Mode for two-on-two team competition. Happy bombing!

NORMAL MODE

STAGE 1

Bomb the dynamite to blow up the other walls.

Place a bomb on the circle and the flames will extend very far.

Bomb the tile over to its piece on the left.

The furnace will glow red and produce a long strip of flame.

STAGE 2

Power enhancements will help you pass some tough levels.

Use the cannon to launch you to the other side.

There's even a boat Bomberman can use to get to the island.

STAGE 3

You'll find plenty of trampolines in this level.

BOSS

This Boss will move left to right and extend his arms. Just lay bombs in front of him.

BOSS

Be careful. This Boss launches bombs into the air and kills himself as they land.

BOSS

The strange sun Boss has an eight-way spark attack and blows horrible flames at you.

ICON DESCRIPTIONS

Throughout the game in either Normal Mode or Battle Mode, you'll find many icons as you bomb the walls. Some will enhance your abilities while some may hinder them.

FLAME
Extend your flame by one block.

DETONATOR
You can blow up your bombs at will.

APPLE
This increases your points by 1600.

BOMB
You will be able to lay one extra bomb.

GLOVE
Pick up your bombs and toss them.

ICE CREAM
This increases your points by 3000.

RED BOMB
Bombs will blast through the rear walls.

SKATES
Increase Bomberman's speed.

HEART
This will allow you to take one hit.

RUBBER BOMB
Bombs will bounce off walls.

KICK
Kick bombs across the screen.

SKULL
Bomberman will be poisoned.

THE BOSS

There are loads of cool new levels that scroll. Each level is also more of a puzzle to clear.

THE DAO

This game, at times, can be very silly o o o w w w. a problem that wasn't in the first. What happened?

THE UGLY

When Bomberman is hit, he turns around and cries, but the tear looks more like a booger.

BATTLE MODE

Prepare yourself for a massive battle. Pick from 16 fighters and square off against each one in a test of skills.

Only the greatest warrior will survive.

Based on the Neo-Geo game of the same name, this translation is a near exact replica. Hard to believe, but it's true. Only a few details are missing. The game plays well, and each character has plenty of moves. All 16 (bosses included) warriors have their own techniques.

For experienced fighters, there's the infamous Death Match Mode with traps like saws and spikes to put a big damper on your day. This is one of the best arcade-to-home translations ever.

THE FIGHTERS...

The two rival ninjas of different clans, Hanizou and Fuuma fight it out.

Both conquerors, the Viking Erick and the marauder J. Carn face off.

Reaputin is a monk with mystic powers. He's going up against Brocken, a cyborg.

In all, there are 14 characters to use in the main game.

The big guy, J. Max takes a break from football to wrestle with M. Power.

Both deadly opponents, Ryoko takes on Jacm, the swordmaster.

The kickboxer Shura takes on the martial artist K. Dragon in a vicious bout.

Captain Kidd (pierre of the Seven Seas) fights the spirit warrior Mudman.

The Bosses Neo Geogus and Dio can be used in the Versus Mode. Cool!

THE GOOD

In terms of a translation, it's very close. Almost everything is here and you can play as the Bosses!

THE BAD

The bonus rounds are gone, along with some of the animations and sound effects. Not too drastic...

THE ONLY

The way you look after Muscle Power does his "number one" move. Reminds me of pizza.

EGM X-TRA DARE TO COMPARE A LOOK AT OTHER FORMATS...

Look at the Super NES version (on top), and compare it to the Neo version. Not much of a difference is there? The attention to detail is almost identical. Almost nothing has been lost from the arcade game.

Sequel to SoulBlazer 2, Illusion of Gaia brings us another epic story of this mysterious land.

It's been one year since the last battle at the Tower of Babel when you lost your father and other close friends. Tim had many dreams where he heard strange voices. Is his father still alive? He now has followed in his father's footsteps by restoring peace throughout the land. He must search for the Mystery Dolls while finding out if his father is still alive. Throughout the adventure he will meet many characters that will aid him in his quest, including Gaia herself.

SOULBLAZER ILLUSION OF GAIA

Avenge your father's death...

Tim, the main character and hero, has an immense adventure ahead of him. Pictured below are his basic moves. On the way, he will learn many techniques for attacking the demons and monsters that have threatened the lands. As for his magic, he will learn specific songs, which he can play with the flute. Collect every possible item you can find. You can check his inventory to see what Tim has in his pockets and see which Mystery Dolls he has. Stats for his health and strength are here as well.

Throughout the game, you will see that there's a statue by Gaia. Talk to her to find out about the figure. You can now stand by the statue to transform into that figure. Go Freedan!

INCAN TERRITORY

This is where Lilly lives and is also one of the Inca Statue's rising places. You will encounter the Elder, and he will give you advice.

Run across the ramp to give yourself enough speed to jump off the other ramp. This will allow you to catch some air-time and land on the hill on the left.

Inside the hill you'll have to break the wall to get into the Inca Statue's room.

Once inside the room, go collect the Inca Statue. Now go to Moon Tribe Camp to find the other one.

THE GOOD

An excellent sequel that will capture your interest in continuing this epic adventure.

THE BAD

It would've been nice to be able to control the travelling sequences and where you wanted to go.

THE ONLY

I wonder how you can hurt somebody with a flute. I'd rather use a sword.

After finding the two Inca Statues, you must go to the Incan Territory and place them on top of an object. If you talked to the Elder, you should know where to place the statues. At the end, there will be a great evil force waiting. Is your strength and health high enough? Good luck!

INCAN TERRITORY

Shien and Aska are two of the last ninjas who are fighting on a world that has not yet grown tired of its civil war. Shien's flying stars pierce shields, armor, and soldiers. His mighty sword kills them all in the blink of an eye. Aska moves her flying stars by the power of her mind. After a huge battle in which they emerged victorious, creatures appeared and kidnapped Aska in the blink of an eye. Shien, now alone, must fight to save her. This game has a Training Mode where you can raise your skill level and practice using the mouse interface that this game uses. You can then use your skill to save Aska.

These bad guys are really cocky! They are basically three different places they

will jump out—far, medium range, and right up under your nose.

The Boss of this level is called Sawtooth. He jumps all around and tries to hit you. Defeat him in order to find out where they have taken Aska, then you have to go through a time portal.

Shiv dumries pop out all over so you can practice your skills.

THE GOOD

This game has a great concept and the mouse interface is totally cool.

THE BAD

The game can get repetitive after a few levels of the same action.

THE ONLY

The Bosses in this game are really ugly!

Shoot at the icons to collect them as you travel throughout the game!

LEVEL 2

After you enter the time gate, you'll appear in a prehistoric-type land.

These frogs are a real pain! They are fast and can move around well.

Using his sword, you can slash your enemies when they are up close.

These ninja frogs come from the back of the screen and leap forward to get you.

Shien can use his sword to do a double slash when they get close.

The little squares in front of you is your sight when you throw stars.

LEVEL 3

Now in Level 3, fight soldiers that run and jump all over the screen. It takes quick moves and excellent timing to stop all of them and their missiles.

Use your mighty sword to stop incoming enemy missiles.

Try to get these guys before they have a chance to shoot you!

It really gets tight when you have to slash the guys and block missiles.

This tank shoots a machine gun at you and it really tears up the ground!

The Boss of Level three is a huge energy ball, who is really quick and can attack from all sides. Quickly rotate when he jumps and lands behind you so that he won't catch you from behind. Your best bet in beating him is to block and then throw as many stars at him as possible to try to score a hit. The Boss is really cool.

Your adventures begin in the faraway land of Vladamaseo, which is inhabited by meffits and monsters of all kinds. The islands of Vladamaseo are ruled by three very powerful leaders: Vampira, General Hessler, and Dracuman. One day, the mighty General Hessler decided to take control of the other two islands, so he brought in an army of zombies and captured the two lead-

ers—Dracuman and Vampira. Now it's up to you, Spike McFang (son of Dracuman), to head to fighter island and train in the many ways of the ancient warrior. With the help of Vampira's daughter, Camela, you must set out across a barren countryside filled with villains of all types in search of your lost parents, and bring peace back to the land of Vladamaseo once and for all.

Right from the beginning, you'll realize that Spike McFang is unlike any RPG you've played before—four-wheeled vehicles take the place of horses and cellular phones for communication.

VAMPRA

GEN HESLER

DRACUMAN

Begin your adventure at Fighter Island, where you can practice the numerous skills you'll need in the long journey ahead of you. 1) Brush up on your jumping skills by leaping all the rolling logs. 2) The Spin Attack is needed in order to crush the falling rocks. 3) Perfect the Hat Toss by taking out the balloon orrers. 4) Take a ride on the white water rapids, while fighting off a school of man-eating piranhas. 5) To complete your training, defeat the master baker himself and his mystical staff. Good luck!

After your training session, head into town to take a look around. It would be a good idea to talk to the people and to check out what the different shops have to offer.

Once inside the shop, you can purchase different types of hats which vary in strength depending on their price. Also purchase magic cards that will restore your health when you're low on energy.

The subsystem is accessed by pushing Select on the controller. Here you can check out all the stats of your player, how many people are in your group, and which magic cards you've obtained.

When entering Felina's castle, the main gates are locked at first. But with a little bit of searching, you should be able to find the key. Maybe one of the enemies ran off with it!

Some beasts look mean at first, but they might help you instead of harm you!

You can save your progress every time you make it to the funny-looking statues.

Inside the dungeon, there are tons of enemies you will have to fight. Two very powerful mid-Bosses are the armor-launching knight and the web-spitting spider.

THE GOOD
The game has an excellent story line and awesome graphics. It can be enjoyed by all ages. Good job.

THE BAD
Even though it is a very challenging game, the older players may be turned off by the cutesy look of it.

THE ONLY
Usually RPGs are filled with mean-looking monsters—not this one. The first dungeon is ruled by kitties.

Deep within the dark depths of Felina's castle lies just one of the many pieces to a long and twisted puzzle.

When you get to the end of the first castle, you must battle Felina. She is a very quick and agile cat. Be careful when she sneaks to the air-kick can be very deadly. When you finally defeat her, she offers you a gold token, which when taken, will trap you in a large steel cage. With no way out, at the last second you are rescued by Rudy, General Hestir's son who will then join in your quest to rid Videmasco of all its evil.

The cute character from Nintendo, Kirby, had many great adventures. What would happen if Kirby and some of the characters from his adventures played golf? You'd get Kirby's Tee Shot. This cute game takes place on elevated platforms where you have to hit Kirby like a golfball through the wild courses filled with traps, levers, and monsters who try to stop you. Items are scattered throughout the courses, and they'll enable you to have certain powers. There will be many more options you can choose from. To hit Kirby, jump over barriers. This is one unique game!

At first, this map will be shown and Kirby will drop down onto the course where you will have to complete the hole.

THE GOOD

An exciting and addicting golf game. I never knew golf could be this fun!

THE BAD

I thought this game was suppose to be out a long time ago. It's too bad. I had my money right here.

THE ONLY

I wonder how Kirby can take the beating? He's lookin' like raw flesh by the end of the game.

Kirby's Tee Shot

You will notice at the bottom right-hand corner that there's a crosshair on Kirby's butt. This is how you will hit Kirby. Move the crosshair around to determine

where Kirby will be hit. The bar on the right will compensate for Kirby's velocity. The higher the bar goes the harder you will hit Kirby. That must hurt for Kirby. Ouch!

If you're not careful with your hitting, Kirby will get seriously injured.

Strange characters, who are your enemies, will be in your way.

The wild hills can predict trouble. Use them to jump over some barriers.

Kirby's Tee Shot has some of the wildest courses ever seen.

Before hitting Kirby, carefully study the terrain and wild surroundings.

You will be shown the course before starting each hole. Prepare yourself.

Here's a cool feature. Double the fun and excitement by having more people play. This game can get addicting for everyone.

Hit the enemies to unveil stars. These stars will help you on the way, increasing your powers and abilities.

FIGHTING	88%

Many weapons are available to you as you fight through the many levels of G2—15 in all! Certain weapons are more effective than others when battling the Bosses.

Always keep your eyes open for hidden rooms. Here you must break the window above the doorway in order to get to the room with the two weapon power-ups.

Even though your android is 15 stories tall, the infantrymen can become quite a hassle!

Some of the Bosses are machines which are difficult to defeat, unless you know their weak spots.

THE GOOD

The game has a nice perspective, which leads you to believe that you are actually a towering mech.

THE BAD

The android seems clumsy at times when trying to attack a Boss or doing the somersault attack.

THE UGLY

The ugliest aspect of G2 is the realism. How come you can't stomp on the innocent people or the cars?

At the control select, configure the controller to suit your style of game play.

G2

Your adventure begins in the downtown streets in a futuristic city that is overrun by war machines. As you make your way down the boulevard, keep your eyes open for 1) aerial attack helicopters that when destroyed will release weapon power-ups 2) energy capsules that will boost your strength, and 3) the car-torcing androids that will stop at nothing to destroy you and your machine.

The people of Waterdeep have one lack of a problem. Seemingly endless streams of monsters are appearing from out of nowhere. You are to find the origin of this evil and destroy it, if you can. Begin your journey underneath the city in the foul sewers. As you enter the sewers, you hear a massive earth slide and walk around to see that your only visible entrance and exit has been blocked off by a staggering amount of rocks. Now you can only follow your original orders and hope you find an exit in the process.

This is a true translation of the popular PC game. Create all four of your characters and hope you have designed the right batch to get you through. This is a 3-D perspective game that allows you to use either your controller or, more preferably, a mouse if you have one. The mouse will make the game much easier to play.

EYE OF THE BEHOLDER

You have lots of classes to pick from. Choose wisely, for you need the right kind of people to get through the game.

Can you figure out how to close this hole? Throw a rock and let it land on the pad to seal this hazardous area.

In order to get through this door you must click on it a several times and then you can pry it open.

There are teleporters. You must walk into them and see where they take you and work from there.

Find the dwarves and later to their story. If you decide to help them, you'll get another character.

You have been trapped in the sewers by a landslide. The only thing to do now is explore every nook and cranny.

THE GOOD

This game will keep you up to the wee hours of the night trying to figure out the mind-boggling puzzles.

THE BAD

It is very hard to start the game because your characters are very weak to begin with.

THE UGLY

Your brain can get pretty fried after trying to solve some of these intricate puzzles.

Monsters up the Yin-Yang

There are plenty of monsters in this game just waiting to taste the cold steel of your swords, but they won't let you kill them without a fight. Just like any other RPG, the further you go, the harder the enemies get. When these pesky creatures from the Dark World attack you, attack back twice as hard.

IT'S WRESTLING GONE INSANE.

When the most outrageous wrestlers in history hit the mats in Saturday Night Slam Masters, what happens is not to be believed.

It's a one-to-four player wrestling insane asylum, where the only rules are - there are no rules.

Every one of the muscle-bound maniacs enters the ring ready to execute (and we mean execute) the kind of head-snapping, bone-crushing moves that will make your body a permanent part of the mat in seconds.

El Stangray executes his flying breadbutt knocking Hoggar flat on his back.

Gunko gets pulverized by multiple hits of Bif Slavovitch's deadly atomic fist.

King Florio pats the pat on Alexander 'The Grater' with a super suplex.

So you better be ready with some back-breaking, spine-popping moves of your own. Ask your opponent to step outside the ring for "no-holds-barred" action. Pick up a table and smash it over his head until birds start to fly.

If you have more than a few screws loose, go single in the one-on-one tournament. Or, enter the Special Team Battle Royale where two teams of two slam until they're victorious.

No wrestling game can match this one.

THE GOOD

If you follow the clues carefully, the game flows pretty smoothly.

THE BAD

You don't get to choose what weapons or arm you want to be equipped with in the game.

THE ONLY

Your head after you put it through the TV because you're angry at the game for killing one of your guys.

Our tale begins in the Shire. Play as Frodo Baggins, who has inherited a ring from his uncle, Bilbo Baggins himself. This ring gives the power of invisibility to whomever wears it. But it is very evil and everybody wants to get a hold of it—this is where your story begins. Journey to Rivendell and find Elrond, King of the Elves, and deliver the ring to him. There are many dangers on the way to Rivendell. Find all of your friends for some much needed help on your journey. The entire fella of all that is good rests in your hands in this long and involving RPG.

This game is a bit of a new twist on RPGs in the sense that it has better real-time fighting—if your friends die, they die

for good without any chance of bringing them back to life. The view is set in an overhead perspective so everything is within easy viewing range. Guard the ring with your life and do not let it fall into Sauron's hands.

This is your Item Selection Screen. To access it press the R button. Look over the people in your party and see their attributes.

After you have amassed a whole bunch of people, fighting the head enemies won't be too tough—now you have people fighting on your side. Just make sure you keep them alive.

The dagger is the first thing you should go after. It will increase your strength and allow you to kill an enemy with fewer hits. It is located outside the caves west of town.

DUCK

Stage One has five scenes, each filled with different kinds of enchanted receptors.

STAGE 1

Fearing harm may come to the rose, the Beast seeks Belle within the castle walls.

THE GOOD

This game has every element of the Disney classic. All the characters are here to entertain you.

THE BAD

Control of the Beast is very sluggish at first. You will have to master his attacks and movements.

THE HOLY

Rrrrrrrrrrrrr ... the Beast could use a breathmint or something. Snort...

Once upon a time in a faraway land, there was a selfish prince who refused to give shelter to an old woman. The old woman was really an enchantress. As punishment, she turned the prince into a hideous beast and left him with a blooming rose. The prince will remain the Beast forever—unless he finds true love before the rose withers.

Based on Disney's classic movie, this Beauty and the Beast game delivers

everything you saw on the big screen. You have to find Belle and win her heart to escape your hideous form. The castle of the Beast is immense, filled with evil creatures and enchanted objects. You must prove your love for Belle or remain the Beast forever!

SPACE SAVING TIPS

In the Beast's castle, you will find items that will prove helpful in your quest. The famous mirror will allow you to see a portion of the scene, but it can be used only once.

Use your brute strength to scale the walls of the castle.

Roar at the creatures to freeze them and activate the levers.

Eek! The Cat ... hrrmm ... a very unique game based on the cartoon series of the same name. Unlike other action games, this has a puzzle twist to it. Eeki the Cat likes to help others, but in return he gets all of the punishments.

Your goal is to lead a vulnerable old lady through the stages. Of course there will be danger ahead—this is where you come in. You have to watch out for certain animals that may hurt the old lady in some way. There are also animals that may aid you, so keep an eye out for them. This game has some funny animations and sounds that are appealing to gamers both young and old. It may be hard at first, but it's just like walking an old lady across the street!

Avoid the monkey at all costs! Try running below it.

Hey burger! Collect four of these delectable items to get a surprise.

The snake will cause you some pain if it gets a hold of you.

Push the old lady over the gator's immense mouth.

Jump on the giraffe's back so that the giraffe can catapult you to the upper level. Don't forget—ladies first.

One way to give the old lady a better chance in crossing a gap like this is to make a bridge with your body.

Eeki! The Cat

THE GOOD

A good game that may become addicting when you try to solve the stages.

THE BAD

The control is a bit rusty. The younger audience may have a hard time with it.

THE UGLY

I don't know how Eeki can take all of the punishments in the game. When will the madness end?

If you don't watch out for the animals, you might end up like this! You'll delay your progress, leaving the old lady vulnerable.

Capcom has done it again! But this time it's a sports car, rather than a fighting game. Soccer Shootout could easily be one of the best sports games to come out this year. Considering the World Cup is coming to the U.S., there are many competitors on the field.

This soccer car leads the competition with six play modes. You can even practice your moves before you take on the world. Another plus is the Indoor Soccer Mode, a fast-paced soccer field surrounded by walls that you can bounce the ball against. Character animations are incredibly detailed. As for the sounds, you can hear everything from the roaring crowds to the ball hitting the goal post. A definite must-have!

Pick from six play modes, and go through training before entering the tournament.

Shoot it out with the computer to decide who's the winner.

Play indoors in one of the playing modes. Fast-paced action!

The SVP Chip, in the center of the board, holds the power that makes V.R. possible.

THE SVP CHIP

Virtua Racing just couldn't be possible on the Genesis without the help of the SVP Chip. But what exactly does this chip do? For starters, it runs at a speedy 23MHz and talks to the 68000 processor already in the Genesis to handle the polygons. In comparison, the Super FX chip in StarFox runs at a pitiful 10MHz. Don't look for many more SVP chip games for a while, at least until Sega creates the SVP "Split Cartridge." And with the cost of the game hovering at a suggested retail price of \$39.99, the SVP Chip is not the most cost-consciousive chip around, but it does make for some exciting action. Virtua Racing looks like it plays faster than the arcade version, not a bad feat for a 32-bit system being reduced to a 16-bit system. The chip allows for faster movement of sprites and achieves better graphics by utilizing 256 colors. The chip does its job well.

SELECT FROM FOUR VIEWS

You can change your views just like in the arcade version. Each view has its own unique perspective to give you a better view of the track or put you in the driver's seat for a more realistic feel.

These transitions can be done at any time and are scaled in and out as smooth as the arcade game. Just be careful not to change perspectives during a tight turn!

Where it comes? The racing game that sent the arcade scene into a frenzy has finally come home. Virtua Racing uses polygon technology and Sega's exclusive SVP (Sega Virtua Processor) to make the game as smooth and fast as the arcade version.

You can tear up three tracks against computer-controlled opponents, or have a friend join in for two-player split-screen action with no slowdown whatsoever! What made the arcade game so original was the fact that you could change your driving perspective. On the Genesis, it's included as well. A real cool feature is the Instant Replay Option. After finishing in a top position, you get to watch the entire race over again from multiple camera perspectives. Considering the fact the races take a couple of minutes, it's an awful lot to remember. Pretty impressive.

Sega pulls a rabbit out of their hat by delivering a solid racing game filled with enough special features and fast action to win any racing fan's heart. Now, about that price...

If you've finished in a top position on any of the tracks, you can view an instant replay of the entire race in multiple angles.

THE GOOD
The speed, fun, excitement, and originality is faithfully reproduced in this cart.

THE BAD
Unfortunately, the three tracks don't offer much of a challenge after playing for a while.

THE UGLY
The flat-surfaced tires look like something out of a cartoon movie. Must be a rough ride.

Virtua Racing

BIG FOREST

The beginner track called Big Forest is the best place to start out. There's a nice straightaway to build up speed and the corners aren't too sharp. Begin the race in the pit which gives you a fair chance at getting in the middle of the pack. Instead of starting at the very end of the field. Overall, this course is very forgiving and gives you a chance to get a feel for the way the car handles during all types of situations. If you look closely on the float turn by the amusement park, you will see some horses grazing in the pasture. It's a nice touch.

Breeze through the checkpoints to earn extra time and keep racing.

Sorry kiddies, the amusement rides in the background are stationary.

BAY BRIDGE

Up next is the Bay Bridge. This track is rough since many of the roads are blocked off by barricades, requiring you to detour to other roads. None of the turns are too sharp but the computer opponents are much smarter now. Just keep your eyes on the road for this track and you'll be OK.

The Bay Bridge offers many twists and is quite grueling when two players compete. The tracks cross over and under one another and can really throw off your perception at times.

ACROPOLIS

Welcome to the most challenging track in the game, Acropolis. This course is filled with tight twists through mountain passes and blistering speeds past a serene lake filled with sailboats. The computer drivers really give you a run for your money and some actually run you off the road! Having the highest view of the track helps for all the hairpin turns. When racing around, see if you can spot the somewhat hidden goat in this level.

Hold onto that wheel Spunky! This is one tough race you got going on!

With two players racing, the action starts burning up the road.

DEMOLITION MAN

Enter the future. In the year 2032, violence and crime seem a memory of the distant past. Weapons can only be found in a museum. What if the 21st century's most dangerous criminal is on the loose? You must send the 21st century's most dangerous cop to capture him, and that definitely

sparks trouble. Demolition Man packs in large detailed side-scrolling and overhead levels, plus gives you a large number of attacks and moves to choose from. Along with the excellent graphics, Demolition Man also has solid game play and continuous action that keeps the game from becoming stale

PROFILE

STATUS: John Spartan (A.K.A. Demolition Man). Former SAPO officer who was found guilty on 30 counts of manslaughter when a building exploded during his arrest of Simon

Phoenix in the year 1995. Placed in Cryo-Prison pending a sentence of life, Spartan is released in the year 2032 to recapture Simon Phoenix who has escaped from prison and is terrorizing the peaceful San Angeles district. An expert in weapons, explosives, and hand-to-hand combat, Spartan is the only hope of ending Phoenix's terror.

THE ROOFTOP

The helicopter drops Spartan into the torched and demolished buildings of the slum where Phoenix is hiding along with an army of his men. Roll through the rubble, slide down ropes, and leap across buildings as you tell your men.

Work your way through the maze of the museum in an attempt to save the hostages. The doors on this level only open if you save all of the hostages in the given area. Check every corner before moving on. There are glass cases which can be smashed to reveal power-ups, but be sure to avoid the C4 traps. They will detonate if you shoot at them!

THE GOOD

The game is loaded with detailed graphics and sports excellent game play.

THE BAD

The overhead levels are not as exciting to play. The side-scrolling levels had more to explore and do.

THE UGLY

When you jump off the buildings don't forget to tie the bungee cord—it's a long fall to the bottom!

THE MUSEUM

SUB-MUSEUM

In the basement, the museum is a replica of a 21st century city setting. Climb across dark balconies and make your way past hidden henchmen and other nasty foes to avoid becoming another MDK statistic.

Avoid Phoenix's plasma shots as you make your escape.

WASTELAND

The Rooftop Level is cake compared to keeping across these buildings!

Some of the jumps here take patience and good timing.

Past the Sub-museum is the wastelands where the remnants of society united to form a rebel band. The skeletons of old buildings hide many dangers, so it's necessary to proceed slowly. The jumps here are more formidable—one mistake and you will plunge to an early grave. Take all precautions!

THE GOOD

I like the way the roads are laid out and I love the different car selection. There is a car for everyone.

THE BAD

Some of the road obstacles are hard to avoid in the bigger cars.

THE UGLY

The crash sequences are cool, but I don't like it when a car doesn't sustain any damage after a huge flip!

OutRunners is a new racing game that is sure to burn a few heads.

Featuring eight different cars to choose from, each with its own look and feel, everyone can pick the car best suited to his/her racing style. There are also two different modes of racing: The Arcade Mode lets you race your car over half the planet while avoiding animals like camels and elephants. The other mode of game play is called the Original Mode. Original Mode has shorter races which give you less time to catch up. This provides a more fast-paced and exciting race. Get ready to burn rubber!

ARCADE

This game features two different types of races. Pictured below is the Arcade Mode.

You'll be able to choose from a variety of different cars to start each race.

The races you drive in during this mode are a lot longer than the Original Mode. At every checkpoint the leader in the race chooses whether to go east or west and that determines where the race will go.

3 SPEED AUTO

ORIGINAL MODE

In the Original Mode the races are not nearly as long as they are in the Arcade Mode. In these races you cannot let your racing rival gain the advantage for even a short while. If you lose your lead, you don't have much time to regain it. This mode is great for those of us who want to race on a shorter course than the ones

Again you can race against the computer or a friend and choose a car and auto or manual transmission.

Watch out for the animals in the road. They can definitely ruin your race.

They really should get up a zebra crossing sign on this stretch!

provided for the drivers in the Arcade Mode of this cart.

See the cheering fans as you come through the gates victorious!

At the end of the race you will get congratulated if you're the lucky winner.

CRASH

There are a lot of places to crash in this game and the scenes are hilarious.

These brave souls actually run after the car when it crashes and catch it!

The crash scenes in this game are both intense and funny.

The canyon walls are again if your car doesn't handle well.

WORLD HEROES

Eight of the world's mightiest warriors have been assembled to challenge your strength. Now over each and every one to become the champ. In this rendition, all eight characters have special attacks, killer combos, and crushing kicks just like the arcade. There are even features not found in the arcade version like Player vs. Player and three- or five-button controller options. This game sports fantastic graphics and tight control. The option for a regular game or Death Mode is totally intense! See if you can win in both matches to become the best of the best... or are you scared?

Choose whether you want to compete in a Normal or Death match.

Normal matches are your average way of fighting and Death matches are explained below. Both are a blast to play.

These are the Death matches which take place inside a ring of electricity. If you touch the "ROPES," you get a pretty nice zap and some of your precious energy flies out the window.

Tons of Killer Moves!

This game has tons of moves for you to try to smash your enemies. With the correct timing, you can destroy just about anyone. Practicing helps you to develop your own combos to bail the pup out of your opponent's.

Check out some of these cool fighting techniques!

You have four different levels of difficulty to challenge yourself with.

THE GOOD

The graphics are very good and the control is even better. This is very close to the Neo-Geo version.

THE BAD

The loss of sleep you experience because you've been playing this game until the wee morning hours.

THE UGLY

Watching skeletons fly around the ring from touching the electricity.

You have eight different characters to choose from. Each one has his/her own

strengths and weaknesses. All have special moves that will do more damage than your normal moves.

STAR TREK THE NEXT GENERATION

The popular *Star Trek* series can now be played on your Genesis. The concept and theme of this game is very clear—defeat any hostile ships and restore peace in Federation space. In order to do this you have to control the Enterprise and its crew. You must respond to any distress signals or protect Federation space from Romulans and other threats. The crew of the Enterprise will gather information and resources to aid you on this adventure through space. Pay attention to Picard's advice on your travels to distant planets and worlds where the enemy awaits.

THE GOOD

The whole crew is here! It's just like watching the real series, but you're in charge.

THE BAD

It's very hard to dispose of the Romulan ships in combat. More Federation ships would be nice.

THE UGLY

I thought it only took one shot from the phasers to get rid of a Romulan warrior. Oh yeah, it's only a game.

COMPUTER

THE ENTERPRISE

The bridge is the heart of the Enterprise. This is where you will be able to control all of the ship's artillery, back-up systems, and communications. Your computer beside you will advise you in every decision. Check the computer for any information you may need.

TACTICAL

Locate your designated course and travel to that specific planet or solar system.

You will travel to many worlds. Scan the planet to check for any lifeforms.

Walking on the surface is very dangerous. Watch out for the Romulans.

BATTLE STATIONS!

Battling against the Romulans will not be easy. Recharge your shield by escaping their torpedoes and phasers.

People are in danger. You will have to comply to the distress signals.

Romulans trick you and will attack you when you least expect it.

Even when you're playing on the EA Golf Game, you know for great courses. And PIA brings you 1 or 2 jobs you do 3 of the best. And don't expect many results from the weathering. It can get downright rainy across the pond.

The course can be played in the way you'll want to be played. In PIA, you can play it all in, but if you're going to take home the big prize, be ready for four of the most exciting matches you've ever played.

The Joy Of Decking...

If you've got a cyber deck and a Data Jack you can enter the virtual reality world called Matrix. Here is where you make the big bucks by stealing information. Guarding the good stuff at the IC. You'll have to crash it or try trying.

MATRIX RUNNING...

Your brother was set up on a run and killed. Venturing into the crime ridden city of Seattle, you must find out who had him killed. Based on the role-playing game system by FASA, choose from three of the character archetypes, each one possessing his/her own advantages and skills. Along the way, you'll be able to increase your attributes and acquire cyberware. You'll even get to enter the Matrix, a virtual reality world of corporate secrets.

Make your contacts and perform runs to make money. These jobs will range from courier work to annihilating hordes of ghouls. The more contacts and money you have, the closer you'll get to finding your brother's killer. Search the sprawls of Seattle for the clues while always watching your back.

SUPER NINTENDO

MEET WITH CHARACTERS

Keep in contact with other fighters and characters who will give you clues about where to go and how to defeat the enemies. Your main ally in the quest is your robot, Elvis.

Star Quest takes players to the fringes of the solar system in a grim future populated with mercenaries. You must team up with your robot sidekick in a star quest to rid the galaxy of the interstellar villains, Void. To complete your quest, you man your star cruiser and explore over 30 planets in four solar systems while interacting with dozens of characters. Combat the enemies in space and on the planet surfaces as you fire lasers and launch missiles from your combat vehicles in an effort to free the galaxy from the Void.

THE GOOD

The game packs a good blend of action and role-playing which combine hours of solid game play.

THE BAD

Controlling your star cruiser's flight through space using your computer can be imperfect and hazy at times.

THE UGLY

Elvis...? I thought he died a long time ago. Now he's back as your sidekick ... whatever!

STAR QUEST

Your first mission is to attack and defeat the Void mothership. Your lasers and missiles are useless against this giant fortress so you have to rely on your ship's shield and use it as a battering ram to penetrate the ship. Once aboard, destroy the smaller enemies, find your star cruiser, and escape before the ship blows!

Use scanners to sneak out the hidden keys on the mothership. Without them you can't finish the mission.

These doors open with keys but are often guarded by robots.

Finally! After destroying all the enemies on the mothership, you locate your star cruiser.

Sylvester and Tweety are up to their old tricks again in this awesome new cart. Sylvester will do anything to get to Tweety and he usually gets into a lot of trouble while doing it. The game features these two characters in hilarious situations directly from the cartoons. You control Sylvester on his quest to catch Tweety. He has a lot of moves and the game requires you to solve various puzzles. Chase Tweety around the huge levels, stacking boxes, and avoiding the dog, the cat, and even the old lady who are all out to get him. Sufferin' succotash!

SYLVESTER and TWEETY IN CAGEY CAPERS

MAYHEM EXPRESS

Chase Tweety through an entire train that is traveling at top speed!

AWESOME ANIMATION

The animation for this game is awesome in every way—even when you die!

Sylvester is still the sneaky cat that you know from the show.

You can use things like this fish and bone to distract the dog or cat.

The wind on top of the train will keep you from walking forward, so jump.

Stack the boxes to reach the high places where Tweety is hiding.

If you fall between cars, you'll be sucked under to an earlier part of the level.

The kangaroo will give you a helpful boost to reach the slippery Tweety bird.

THE GOOD

The animation and the game play are both top-notch. This is one of the best Looney Tunes carts ever.

THE BAD

The dog will appear and knock down the boxes that you stacked up and then he'll beat you up!

THE UGLY

The look on Sylvester's face when he gets sucked under the train, it's not pretty.

You will finally get Tweety in the last car, but then it's off to the next stage.

Racing

Impact yourself in a stock car, taking turns at 100 to 150 miles an hour.

Feel the wind rush by you and the power of the engine roaring under your legs and hands. Experience the realism that is involved in this game.

You got to control everything in this car. If you don't like switching gears, you can race with an automatic car. You also have to really control your car in the turns by watching your speed and countersteering so you don't spin out. The higher you place, the more money you get and the better the items you can buy for your car. Get ready to ride in the fast lane!

This Indy car has a maximum speed of 200 miles per hour. Use the rearview mirror to see where your opponent is and don't let him pass you.

This is the stock car with a max speed of about 100 miles per hour. This screen allows you to look at your car as if you were behind it.

Save your money and buy only the best for your car in order to boost performance.

THE GOOD

This game has a more realistic feel because you actually have to countersteer so you don't wipe out.

THE BAD

Controlling your speed and the countersteering in the turns is really tough to get accustomed to.

THE UGLY

Watching yourself lose first place because you slid out of control in a turn.

You can change your screen to a full view and enjoy the scenic skyline.

This is the sprint car with a maximum speed of about 100 miles per hour.

Try the course out before you race! Andreotti gives you hints to help you in the race.

This is the career circuit. You start in the Sprint Circuit and move on to the Stock and then Indy.

Choose the type of car you would like and prepare for heavy duty racing on some tough courses.

In a single race, choose the car you want and then race on the track to see how well you do.

THE GOOD

The story line is extremely intriguing, and the voice actors did a remarkable job with this game.

THE BAD

This game can get quite frustrating when you are trapped by something you didn't do earlier.

THE UGLY

The look on your mother's face when she hears the consistent swearing from the television!

The setting places you in the distant future, where death and decay have joined hands with corruption, poverty, and unparalleled crime. In a nutshell, life isn't a beautiful choice in this fictitious realm. You take the part of William "Blade" Hunter, who has become part of an ancient prophecy that is about to come true in this fatalistic urban nightmare.

The game is set up in a cinematic choose-your-own adventure style, that leads off into multiple paths and directions sending you deeper into the mystery, and into greater danger as well. The majority of the interaction will take place utilizing actual human voices. The story line delves deeper as you explore new realms and figure out tough puzzles. Time will pass, and new events will arise.

Rise of the Dragon

YOUR APARTMENT

Everyone has a place to call their own, and you are no exception! Be sure to get your ID card in the VHS Phone slot and the keys for your cabinet from Karen, for there are some special pieces of equipment you will need there.

It may be a rat hole, but it's home! Stop back every so often to check for calls, and be sure to return before 1 a.m. to get some sleep.

ENTER CITY HALL

City hall is open between the hours of 9 a.m. to 5 p.m. You can acquire information from Karen, flirt with the secretary, or have a prolonged talk with the mayor over the ethics of your work. Check back here often.

Here, you can get information from Karen, see the mayor, or try feebly to get into the police armory! Don't forget to check in at the desk!

PLEASURE DOMES

After receiving orders and a photocopy from the mayor, you must venture into the hostile realms of the Pleasure Domes. Once here, you must locate "The Juke," the best place to look for him is next to the bar.

You will find all kinds of strung-out freaks living it up here. Just be careful not to hurt their pride or they may just hurt you!

THE WAREHOUSE

From time to time, crimes show what is happening within the warehouse near city hall which is mass producing the killer drug. To give yourself more time, blow this pop-stand by placing a charge on the electrical!

As soon as you enter Chen's home, you will find him struggling frenetically on the floor as he dies!

(ACTUAL SCREEN SHOTS)

Forget cute little computer animation. Tomcat Alley is the real deal, hotshot, with balls-to-the-wall live action. It's full-screen, full-on aerial action like you've never experienced. Tomcat Alley features seven different combat missions against air and ground targets. And you don't just see the action from under the canopy, you also get a bird's-eye view outside the plane. In fact, Sega TruVideo™ technology takes you as close to the edge as you can get without packing your own chute and wearing one of those helmets with the goofy nicknames on it. Once you've been to Tomcat Alley and back, no little simulator game will do. So bail out on the rest and lock on to the real jet fighter action of Tomcat Alley. Only on Sega CD.

SUPER LOOPZ

The game play sounds simple...put a few shapes in the right place and complete ten "Loopz" per round. But then there's the time limit to place each piece. (Mmmm...)

Of course if you want to make some real points and get to the bonus levels you need to make big, twisty "Loopz" that have more angles than a con artist.

Oh boy is that lookin' goood! All you need is that one cutesy little piece.

BAM!

Here comes one of those gargantuan pieces that fit in about as well as a growling stomach on a first date.

BOOM!

You thought too long. One chance down and two to go.

Of course you can try the memory game where you start out with a completed loop, and one by one, the game takes the pieces away.

How's your short term memory?

- One or two players—head to head or cooperative
- Four game modes—arcade, standard, challenge, or puzzle
- Variable difficulty which can be different for each player
- Over 20 levels
- Password save feature

Beware the Velociraptor!

You look over your shoulder and see a Raptor breathing down your neck. Run and hope you can get away. After running through a door, you close it quickly behind you, and hear a thump and a high pitched screech. Success—you have gotten away this time. That is what it is like on this level, where you must trip the Raptor and get out of the building.

IN THE PARK

The computer shows you where the dinosaurs are inside in the park.

Watch out for the Deadly Dilophosaurus Spit!

Man, those Dilophosaurus are creepy! Their little shrieks and whistles send chills up and down your spine. Then, they spit this gloopy green goo at you and it hurts. Not only does it hurt, but you even lose more and more of your sight every time you get hit with it. All you have is a Therac, but if you get rid of them all before you go totally blind from the deadly venom, you move on. Watch out or more will pop out. Just remember, they should all be destroyed.

Nedry's Foul Security System Block

Level 1: This is a space invaders type game. You must shoot all the guys floating on the screen. In order to move to the next level, score 20,000 points.

Level 2: This game is like the classic game Galaxian. Shoot all the guys on the screen and score yet another 20,000 points to advance.

Level 3: Divo egg on is like a type of 3-D Breakout. The ball bounces at you and you must bounce it back. Score 20,000 points and move on to the next level.

Level 4: Tricera-stomp is like the old game Tank Assault, where you must drive around and blow up lots of attacking Triceratops.

Level 5: Here is a twist on the classic Asteroids. Fly around and destroy foppy disks. To pass this last level, score 20,000 points and fly into the fan.

THE PLAN:

Dennis Nedry decided to be a pain in everyone's behind and disable the security program. Not only did he disable the security, but he also encoded everything so no one else could enable them for a while. As one of two parts of your objective, you must get rid of Nedry's security block by playing his little games and moving up levels in security. Once you do that, your goal has been reached and you can continue on.

Speed away in your jeep—the T-Rex is right on your tail! If that isn't enough, you must dodge hazardous objects in the road. Try to drive a certain amount of miles to outdistance the T-Rex or you're dead meat!

If and when the T-Rex should capture you, here is what you'll see. So this doesn't happen to you, steer clear of all obstacles and only brake when absolutely necessary.

Jurassic Park is just as frightening to play as it was to watch. This game boasts incredible graphics, sound, and game play. Jurassic Park's head computer wiz Dennis Nedry, in his infinite wisdom, decided that John Hammond wasn't paying him enough money, so Nedry was hired by another company to smuggle viable embryos off the island. In his attempt, an unpredictable storm

messed up his plans and left the island completely off-line. You must get through Nedry's security system and reboot the computer. Plus, save the five people that are trapped throughout the island by saving each one individually to the helipad. Prepare yourself for an incredible visual treat—the dinosaur models that were used in the movie are also used in the making of this game. Can you save everybody in time? If not, they're all dead—even you!

THE GOOD

The graphics are some of the best I've ever seen, and it's Jurassic Park. Need I say more?

THE BAD

The only bad thing about this game is that I now have to go out and buy a 3DD. This game is that good!

THE UGLY

Looking at your car after the T-Rex gets a hold of it. What a pile of junk!

Some secrets can only be defeated by special items you can buy in the shop.

THE GOOD

Litil Divil is a great game that can be played by all ages—young or old. Great sound!

THE BAD

The only bad part about this game is that it can be very addictive if you're not careful.

THE HOLY

The little demon, which is supposed to represent evil, is so humorous that he'll have you in stitches.

Litil Divil is a very unique game. It has all the aspects of a good role-playing game, but doesn't bore you with all the technical stuff, like keeping track of stats for a whole bunch of characters, tons of text, or huge weapon subcreens. What Litil Divil does offer you as a game that is easy to learn, but is also very

challenging when it comes to completing the many complex puzzles that have to be solved. Search high and low through many areas in order to collect the right items to make it to the next area. The corridors are filled with many traps and pitfalls, so be very careful. Good luck, and above all, have fun!

Most of your adventure is spent wandering around the twisted corridors, searching for the many items you need before you can solve the puzzles. Always keep a lookout for any food you might find lying around, and remember not to trust anybody or anything.

Ringin' the bell decides whether or not you have the right items in the puzzle.

Your first enemy may be ugly, but he's only an overland bug.

When you fight the sumo wrestler, make sure not to let him get on top of you or you may never get up again. To beat him, try a pinning combination.

The puzzles get increasingly difficult as you go. Here you must set the three switches in the right direction, so the flames will melt the rope.

ZODA'S STAR TROPICS REVENGE II

Chapter 1

Say hello to Mike, the hero of our story. In the opening scenes, he reminds you of how, in the last game, he saved his uncle and seven space children. At the beginning of this adventure, he gets a message from space that he must go back in time to gather tetrads before Zoda gets them.

Chapter 2

This guy tells you to watch out for holes that are up ahead in the snow.

The hearts will replace the if you have been hit by an enemy.

THE GOOD

This game has an interesting story and I like the fact that there are two different modes of play.

THE BAD

The game lacks good control in the action sequences, which makes it more than a little frustrating.

THE UGLY

When you walk into Yum-Yum's cave you see him munching on somebody. Gross!

Zoda's Revenge is the sequel to the very popular game, Star Tropics. Mike is back after the adventure where he saved his uncle the apertinal and some space kids. His uncle is trying to crack a special code that gives him a special word. When Mike finds and reads the word, he gets sent on an incredible adventure that teleports him back in time. After the first level, he realizes that this wasn't an accident, but that he has been chosen to face the evil Zoda once again in order to recover block-like creatures called Tetrads. This game has levels that are both RPG and action.

In the hole, play the other perspective of the game. It has more action!

Here's the way inside the caves. Talk to the people living there.

Storm

Ororo Monroe: Storm has the ability to control manifestations of weather—for example, she can create bolts of lightning or cause whirlwinds to form around her. All these can give her an advantage.

Spider-Man

Peter Parker: Spider-Man has super strength, balance, and reflexes, and can stick to walls. The Web-Slinger also has premonitional spider-sense and a web-shooter to boot!

Arcade has taken the X-Men hostage and you, as Spider-Man, must rescue them. In your attempt to do this, you are caught. Now Spider-Man, Cyclops, Wolverine, Storm, and Gambit must escape Arcade's playground. Grab your GG and don't let go of this action-packed side-scroller. After the first level, you get to choose from all five characters.

Gambit

Remy Le Beau: Gambit can charge any object with kinetic energy, causing it to explode on contact when thrown.

Wolverine

Logan: Wolverine has the power of self-healing and also has unbreakable adamantium claws and skeleton.

THE GOOD

Being able to choose from five characters is truly a nifty feature in this game.

THE BAD

Spider-Man is very hard to get used to controlling because he has so many things he can do.

Extreme-ly Cool Gear

Bizarre and wonderful things happen when sub-cultures collide. Now comic book collectors and skateboarders have a common ground, and the world is a more interesting place. Extreme studios, already famous for publishing such books as *Youngblood* and *Glory* have created a new line of skateboards. They are all set for distribution in skate and sport shops in 47 countries.

According to Jim Gray, President of ACME Skateboards, the company producing the boards, "We've done hundreds of different designs and these graphics are, by far, the highest quality we've ever put on a skateboard and initial demand for the product has been overwhelmingly strong."

If ACME gets the cool graphics it wants, *Extrema* is hoping for a slew of new readers. "We're using powerful graphics to attract attention," says Matt Hawkins, promotions and marketing director for *Extrema*. "All of our ancillary products, like the skateboards, are intended to boost sales for our comic books."

You can try to catch a look at them on MTV's new game show, *Trashad*, at 6:30 weekday nights, where they are being offered as prizes. They might even pop up at your local comic book store, since retailers should be able to order the boards.

Strange but True

Talk About Coming from Nowhere

The rock group The Knack, who were one-hit wonders in the 1970s with their smash *My Sharona*, made a return appearance on *Billboard's* Hot 100 at #91 with the same song. The song is part of the *Reality Bites* soundtrack.

Woodstock Revisited?

After months of red tape, plans were finalized for a 25th Anniversary of the Woodstock Music and Art Fair. The two-day concert event is scheduled for August 13-14 at Saugerties, a rural town in upstate New York near Albany.

If You Gotta Wear a Tie...

All the posters, video games, and Pez dispensers just weren't enough. Sure, they were reminders of the characters we loved, but they had to stay at home. There was always a need to take a part of our wisted childhood with us into the responsible, adult world.

And now you can. Thanks to new licensing agreements, DC Comics has put some of its most popular characters onto ties that will make everyone give a second look, and keep you—or your Dad—from taking life too seriously.

Fashion Corporation of Boca Raton, FL, puts out a line of silk and polyester ties that sell for about \$12.00 and up. For the more style-minded, Famous Neckwear of Montreal has 100% silk ties that start at \$30.00. And for the office fashion-plate, Leeds Neckwear of Concord, Ontario, can put your favorite hero around your throat for a mere \$45.00.

Blockbuster Video Sponsoring Major Video Game Contest

Put on the game lace. Get in the zone. And keep those thumbs limber. The first ever World Video Game Championship competition is about to begin.

Blockbuster Video is sponsoring the event with about 2,600 participating Blockbuster stores in the U.S., Canada, the United Kingdom, Chile, and Australia.

The event begins May 16 with the local qualifying rounds. Players age 20 and under can sign up at their local participating Blockbuster for the in-store round of competition. In-store play starts on June 15 and will last three weeks.

Each week of the competition, contestants play a different game in the format of their choice, either *Sega Genesis* or *Super Nintendo Entertainment System*. One *Sega* player and one *SNES* player with the highest cumulative scores will be crowned store champions and move on to their respective regionals.

In regional competition, some players will go head to head in tournaments. Other players will be entered into a drawing in a statewide pool.

All in all, 300 players will advance to the finals of the World Game Championship to be held in Fort Lauderdale, FL, August 19-21.

CULTURE SOURCE FOR EGM READERS

ASG Introduces the Jukebox of the 21st Century

It's a sight common to any house with video game fanatics. Cartridges every-

where. In stacks on the floor in front of the TV. Stuck in-between the couch cushions. Thrown somewhere behind a potted plant. They get dusty. They get broken. They get in the way.

And why?

Well, you're playing them.

People used to have the same problem organizing their music, and for the same reason. Why be committed to an entire side of a Little Richard record when you could suffer an Elvis attack the next second? As any fan of the Ring will tell you, there's nothing worse than having to sort through your music collection to find the song you need in the middle of an Elvis attack. The solution then was the jukebox, and the solution now is the new Video

Jukebox from ASG Technologies, Inc.

The Video JukeBox is a networked peripheral for use with Sega Genesis, Sega CD, Nintendo SNES, and Atari Jaguar. Each unit holds up to six cartridges and links up to your TV or video game monitor. Access whatever cartridge you want at the touch of a button, and then play any game on that cartridge. Simple. If you have more than six favorite cartridges, the VJ units are designed to daisy-chain to one another. Two units will link together to hold 12 cartridges, three to hold 18, and so on. Access any game you want from a single control. Manufacturer's suggested retail price: \$49.99.

But we can hear the complaints already. "Look, I bought a VJ to reduce the clutter in my home. But now I have a remote for my TV, another for my VCR, and a third for my stereo—not to

mention all the controllers for my video games. I just can't deal with one more little box of buttons."

Well, you could duct-tape everything to the arms of your chair and pretend you're Captain Kirk on the bridge of the Enterprise, or wait for ASG's universal infra-red remote to come to a store near you. It won't

just control a VJ. It will control any game the VJ can play thanks to a built-in game controller dock. And yes, it will work on all the other toys you technojunkies out there love—TV, CD, VCR, etc. Suggested retail price is \$39.99. ASG Technologies, keeping America free from clutter.

The Mask Coming Soon

He's stylish. He's indestructible. He's charismatic. He's nuts. He has this big green head. He's the Mask, coming to the silver screen through New Line Cinema from out of the pages of Dark Horse comics. Jim Carrey stars as Stanley Ipkiss. Look for lots of laughs and plenty of action in *The Mask* this summer.

It just ain't right...

Since this book has showed up at our offices, HERO editor Frank Kurtz has gained a keen interest in sandwich preparation—not to mention 25 lbs. "Hey Frank. How about another one of those tasty cream cheese and peanut sandwiches?"

Speculator Market Fueling Downturn

Unless you're in the comic book business you probably haven't heard about the speculator fiasco of the summer of 1993. It is to the comic book industry what October of 1929 was to Wall Street, and the impact is still being felt. Why should you know about it? Because it set a few dangerous trends in motion that, like it or not, will be around for a while. Why should you care? Because it might push some comic books off the shelves of your local comic book store, and might affect the quality end content of those that remain.

Oddly enough, it was the growing success of comic books as a business that set the industry up for a fall. A great deal of attention on TV, in print, and in business circles began to attract investors and speculators, who saw comic books not as entertainment, but as collectibles that could be resold for a quick profit. To many of the speculators, comic books were not a media or an art form, but things to be bought and sold.

Be that as it may, the speculators were a new market. They bought the books in fifties—they had to show a decent return on their investment. So the major comic book companies decided to cash in. They began marketing their books to attract speculators. They sold comics in bags. They featured hot artists. They came up with gimmicks like gold foil, die-cut covers, glow-in-the-dark covers, and even holograms. And of course they used all the old tricks: if a title was hot it got a spin-off, if a character was hot he made crossovers (do you remember a couple of months when the Ghost Rider was on the cover of everything?) and devastating, earth-shaking, changing-the-world-as-we-know-it plots. And if the book became a

hit? They put out a second edition. And a third. And then a collected edition. It all climaxed with the death of Superman. And the comic book companies, distributors, and stores made money hand over fist—for a while.

Then the bottom dropped out. The market was saturated, and none of the speculators were making money on what they bought any more. They left, and only then did the comic companies see the damage they had done to themselves. The core market, the regular readers who bought the same book month in, month out, had been leav-

ing in droves while the speculator rage was on. The people who actually went home and read the stories had gotten fed up and decided to spend their money elsewhere. Retailers and distributors were stuck with a glut of unwanted books.

What to do? On your next visit to the comic book store, spend a little time searching shelves. Take a chance on an independent, or a company like Dark Horse, Kitchen Sink, Blackball, or Slave Labor; or a character like Bone or CUD. Buy it and take it home. Not to sell it later, but to read and enjoy.

This month in **HERO**

Once you get past the Blackball cover, you'll get instructions on how to write comics. In **HERO #11**, you'll also get a behind-the-scenes glimpse of Superman and Batman's home—

DC Comics, and a visit with **MAD** magazine's Mort Drucker.

This month in **CARDS**

The big news this month in **CARDS ILLUSTRATED #5**, is the launch of MTV's Beavis and Butt-head trading cards from Flair. You'll also get the inside scoop on the upcoming Batman card set from SkyBox, as well as the latest on Flair's fantastic Marvel Flair project.

Lion King may Rule the Box Office this Summer

The people at Disney studios have a new animation blockbuster set to take the country by storm this Summer. Following the critical and commercial success of *The Little Mermaid*, *Beauty and the Beast*, and the top-grossing animated film of all time, *Aladdin*, the people at Disney have assembled the vocal talents of James Earl Jones, Matthew Broderick, Jeremy Irons and Whoopi Goldberg, the musical talents of Elton John and Tim Rice, and the academy award winning work of the Disney Animation Studios to bring *The Lion King* to the big screen.

The Lion King is something of a departure for Disney. For one thing, it's based on an original story, rather than an adaptation of a familiar one. For another, this is the first Disney feature that throws out the old rule, "you gotta have a human in there." *Lion King* is a 100 percent talking animal movie. Set on the plains of Eastern Africa, the cast includes beaver lions, evil hyenas, wacky wart hogs, wise baboons, and lots and lots of wildebeests—all in an allegory about growing up and accepting responsibilities.

Simba the lion cub is destined to one day lead his people and preserve the "circle of life" or balance of nature. But Simba is young and sees life as all fun and adventure, and spends most of his time playing with Nala, another lion. When Simba's father Mufasa is killed, the evil lion Scar sees a chance at power. He convinces Simba that his father died because of him, and in shame Simba slinks off to the jungle to hang out with a wart hog named Pumbaa

and a meerkat called Timon. But one day Nala—who has grown into a beautiful lioness—tracks him down and explains to Simba that bad times have fallen on the pride, and only he can put things right again. Maybe it's hormones, maybe it's the advice of the baboon shaman Rafiki, or maybe it's just destiny, but Simba returns home for the big showdown with Scar and his hyena hunkies, Shenzi, Banzai, and Ed (Ed!). Along the way are laughs, action and tender moments, all set to music.

The big hype surrounding the Disney movies of the past decade has been the music, and *The Lion King*'s no exception. Elton John provides the vocals written by Tim Rice, whose credits include *Evita*, *Jesus Christ Superstar*, and *Aladdin*. There should be some strange stage shows next Oscar night based on their work. Hans Zimmer wrote the background music and introduced authentic African rhythms and instru-

ments into the score. Look for the CD to top the pop charts.

But the real reason for going to the fantastic animation. More than 600 animators worked for three years to create more than one million drawings. Extensive research in Africa shows through in each background, making the landscape a character in its own right. Like the cave sequence in *Aladdin* and the ballroom scene in *Beauty and the Beast*, *The Lion King* has a set piece that pushes the art and technology of animation to its limits: a wildebeest stampede. If you thought the Gallinimus in *Jurassic Park* were impressive, you need to see this movie.

But the best work that the animators at Disney do is the stuff you never notice; working with a drawing until the audience forgets it's a

drawing, and starts to see it instead as a person. Providing the voices for these characters are some of the top names from film, television, and Broadway. It seems as if the creators came up with a wish list of who they wanted in the film, and the producers had enough clout to make it happen. For the older lion king Mufasa, who else but James Earl Jones? For a young male lion coming of age in the world like Simba? Matthew Broderick, of course (with Jonathan Taylor Thomas of TV's *Home Improvement* playing the cub Simba). And if villainy has a voice it must be Jeremy Irons (*House of the Spirits*) as Scar.

Tiger the King of the Hand-held Jungle

Hey kids! Remember Quiz Wiz? You know, pop in a cartridge, slip in a quiz book and test your trivia knowledge while driving Mom and Dad insane with the little bleeps? Well it's still out there, and the company that brings it and a wide variety of other games and toys to you is Tiger Electronics.

Tiger started 15 years ago producing electronic games and components, and they are still going strong. The company grew and began putting out its own product line. Now Tiger has licensing agreements with film, television, and video game companies, and produces games and toys based on popular characters. Have you ever been browsing the shelves of your local toy store and been boggled by the Full House board game? Amazed by the Saved by the Bell dolls? Intrigued by the Super Dave Mobile Stunt Center? Tiger is behind them all.

But the cash cows at Tiger are their hand-held electronic games. Completely self-contained with a liquid crystal display, you can find one based on your favorite movie, cartoon, television show, or video game, no matter what your favorite may be. We're serious. They have all the Disney stuff, from Little Mermaid to Aladdin to the yet-to-be-released Lion King—even classics like Sleeping Beauty or 101 Dalmations. Like action movies? They make games based on Demolition Man, Jurassic Park, and the Shadow. Say you're more of a

science fiction fan? They've got Star Trek. They've got Alien. Comic book fan? X-Men, Spider-Man, Superman, and lots of Batman. Video game junkie? Sonic 2, Street Fighter II, and new this summer, Mortal Kombat (which is looking to be their best seller ever). Simpsons? Yup. Home Improvement? Yup. Beavis and Butt-head? God help us, yes.

Tiger Electronics keeps finding innovative ways to grab your attention. One of their new ideas is talking games, where the characters provide commentary and advice. Another is using, of all things, bar codes. Yes, those things you see at the supermarket check-out counter. Games using the new technology will have a slot where you can fit in a bar code card and make the character get bigger, get faster, or get an extra life. They even supply blank cards so you can cut the bar code off your pack of Twinkies (or whatever), glue it on, slip it into the game, and see what happens. Can you imagine mixing Sleeping Beauty with, say, Jolt cola?

They're fun, they're inexpensive, and just think how many family car trip disasters could be avoided if parents tossed a few Tiger electronic games to kids in the back seat?

Tiger Electronics just about has the market cornered on cool licenses for its hand-held electronic games. From Jurassic Park to Star Gate—they got 'em all.

HERE'S HOW IT WORKS:

Call us with a list of your games in alphabetical order. We'll give you a price for each game or a package price for all. Keep in mind that you will be paid more for your games if you have the instruction book and the box for each. You'll get an authorization number over the phone which guarantees our quote for seven days. Pack up the games and send them to us right away by registered mail or U.P.S. with the authorization number on the label. We'll send you a check on the same day we receive your games. That's it!

Our address is: CAMBRIDGE/AMHERST
2558 Delaware Avenue, Buffalo, New York 14216

**STANDARD
DISCLAIMER
STUFF:**

We have the right to refuse any purchase. The games sent to us must be in good working condition and free of physical damage or we will return them to you at your expense.

NEVER LOAN OUT YOUR STICK.

"Hey, Billy, since you're gonna be away, can I borrow your Fighter Stick for a few days?" I promise—I'll take real good care of it. ... That's how it starts. Then days turn into weeks, and the

next thing you know, you and your former best friend are duking it out on the People's Court. One look at the Fighter Stick, and you'll know why. There's enough power here to change a person, to make 'em

untrustworthy, even. There's Turbo-Fire and Auto-Turbo, with up to 36 shots per second. And super-streams lets you digest those really tough moves. So, quit wrestling with those bor-

ing, wimpy control pads—reach for the Fighter Stick SN for the Super NES or the Fighter Stick SGB, for Sega-Genesis and Sega-CD.

IT'S HOW TO WIN!

RETROMAGS

Our goal is to preserve classic video game magazines from years gone by, before they are lost forever.

Thanks goes out to everyone who makes this possible. Starting with the original writers and editors, to all the people involved in acquiring and digitizing these magazines.

People interested in helping us out, in whichever way possible. Either by donating magazines, scanning, editing or helping in the distribution, visit us as www.retromags.com

We are only interested in preserving magazines which are published prior to the year 2000.

We have no desire, nor intent to profit from these scans in any way.

So please, if you come across people trying to sell these releases,

DO NOT SUPPORT THEM!

THANK YOU!
